Activists beyond Borders Margaret E. Keck, Kathryn A. Sikkink, 2014-02-15 In *Activists beyond Borders* Margaret E. Keck and Kathryn Sikkink examine a type of pressure group that has been largely ignored by political analysts networks of activists that coalesce and operate across national frontiers Their targets may be international organizations or the policies of particular states Historical examples of such transborder alliances include anti slavery and woman suffrage campaigns In the past two decades transnational activism has had a significant impact in human rights especially in Latin America and advocacy networks have strongly influenced environmental politics as well The authors also examine the emergence of an international campaign around violence against women

Activists beyond Borders Margaret E. Keck, Kathryn Sikkink, 1998 In *Activists beyond Borders* Margaret E. Keck and Kathryn Sikkink examine a type of pressure group that has been largely ignored by political analysts networks of activists that coalesce and operate across national frontiers Their targets may be international organizations or the policies of particular states Historical examples of such transborder alliances include anti slavery and woman suffrage campaigns In the past two decades transnational activism has had a significant impact in human rights especially in Latin America and advocacy networks have strongly influenced environmental politics as well The authors also examine the emergence of an international campaign around violence against women

Activists Beyond Borders Margaret E. Keck, Kathryn Sikkink, 1998 The conventions of the nation state have shaped our contemporary understanding of the process and politics of social movements Keck and Sikkink sketch for the first time the dynamics of emergence strategies and impact of activists from different nationalities working together on particular issues This eagerly awaited work will alter the way scholars conceptualize the making of international society and the practice of international politics

Activists Beyond Borders: advocacy Networks in Inter. Politics Margaret E. Keck, 1998

Global Humanitarianism Daniel Robert DeChaine, 2005-01-01 In *Global Humanitarianism* Daniel Robert DeChaine undertakes an historical cultural analysis of humanitarian NGO rhetoric and politics He focuses his study specifically on MZdecins Sans Fronti_res and the International Campaign to Ban Landmines This book besides being the first of its kind offers to the disciplines of political science cultural studies and sociology a model with which to consider the political and social roles of NGOs in the ever changing global community

Latina Activists Across Borders Milagros Pea, 2007-04-04 DIVCompares women s organizing efforts in Mexico and in the borderlands to assess the way Latina mobilization and activism is influenced by the socio political context in which the groups of women find themselves div

Transnational Advocacy Networks in the Information Society Derrick L. Cogburn, 2017-01-11 This book examines the role of transnational advocacy networks in enabling effective participation for individual citizens in the deliberative processes of global governance Contextualized around the international conference setting of the United Nations sponsored World Summit on the Information Society WSIS in 2003 and 2005 the book sees epistemic communities and information and

communication technologies ICTs as critical to the effectiveness of this important organizational form Historically governments have dominated the official conference diplomacy surrounding these World Summits However reflecting the UN General Assembly resolution authorizing WSIS transnational civil society and private sector organizations were invited to participate as official partners in a multistakeholder dialogue at the summit alongside the more traditional governments and international organizations This book asks are transnational advocacy networks active in the global information society influential partners in these global governance processes or merely symbolic tokens or pawns Cogburn explores the factors that enabled some networks such as the Internet Governance Caucus to persist and thrive while others failed and sees linkages with epistemic communities such as the Global Internet Governance Academic Network and ICTs as critical to network effectiveness

Illusions of Control Erica L. Gaston, 2024-08-06 Over the last two decades the United States has supported a range of militias rebels and other armed groups in Afghanistan Iraq and Syria Critics have argued that such partnerships have many perils from enabling human rights abuses to seeding future threats Policy makers however have sought to mitigate the risks of partnering with irregular armed groups Militia group leaders in far flung corners of these war torn countries were subjected to background checks and instructed about international law and human rights and their funding was cut when they crossed red lines To what extent have such mechanisms curbed the dangers of proxy warfare and what unforeseen consequences has this approach unleashed Drawing on a decade of field research and hundreds of interviews with stakeholders Erica L Gaston unpacks the dilemmas of attempting to control proxy forces She demonstrates that although the tools U S policy makers used to constrain partners behavior increased in number and sophistication they never fully addressed the range of political security and legal concerns surrounding these forces Moreover by shifting policy makers calculations the use of proxy forces introduced additional moral hazards and may have enabled riskier decision making Featuring substantial empirical detail and close analysis of key internal debates Illusions of Control offers new perspectives on some of the most significant and controversial elements of recent U S security policy In addition to nuanced insights about proxy relationships this book provides a novel analytical toolkit for exploring transnational bargaining and foreign policy deliberations in hybrid political environments

Taking Trade to the Streets Susan Ariel Aaronson, 2002-05-14 In the wake of civil protest in Seattle during the 1999 World Trade Organization meeting many issues raised by globalization and increasingly free trade have been in the forefront of the news But these issues are not necessarily new Taking Trade to the Streets describes how so many individuals and nongovernmental organizations came over time to see trade agreements as threatening national systems of social and environmental regulations Using the United States as a case study Susan Ariel Aaronson examines the history of trade agreement critics focusing particular attention on NAFTA the North American Free Trade Agreement between Canada Mexico and the United States and the Tokyo and Uruguay Rounds of trade liberalization under the GATT She also considers the question of whether such trade agreement critics are truly

protectionist The book explores how trade agreement critics built a fluid global movement to redefine the terms of trade agreements the international system of rules governing trade and to redefine how citizens talk about trade The terms of trade is a relationship between the prices of exports and of imports That movement which has been growing since the 1980s transcends borders as well as longstanding views about the role of government in the economy While many trade agreement critics on the left say they want government policies to make markets more equitable they find themselves allied with activists on the right who want to reduce the role of government in the economy Aaronson highlights three hot button social issues food safety the environment and labor standards to illustrate how conflicts arise between trade and other types of regulation And finally she calls for a careful evaluation of the terms of trade from which an honest debate over regulating the global economy might emerge Ultimately this book links the history of trade policy to the history of social regulation It is a social political and economic history that will be of interest to policymakers and students of history economics political science government trade sociology and international affairs Susan Ariel Aaronson is Senior Fellow at the National Policy Institute and occasional commentator on National Public Radio s Morning Edition

Theories of International Relations and Northern Ireland Timothy J. White, 2017-01-29 This book uses the case of Northern Ireland to evaluate theoretical approaches in international relations It investigates the process of negotiation that led to the signing of the Good Friday or Belfast Agreement and the continuing challenges to peace reconciliation in Northern Ireland Incorporating the work of leading scholars it explores a wide range of topics including the function of deception in promoting peace the question of partition and how it was reimagined by nationalists such as John Hume and how the decommissioning process led to a role in internal policing for paramilitaries The influence of outside actors notably the United States and the European Union is also considered along with the involvement of the Catholic Church and the marginalization of women This book will be important for academics interested in theories of international relations and to a wider public interested in understanding the Northern Ireland peace process

Environment, Inc Christopher John Bosso, 2005 To understand the environmental movement is to understand environmental organizations And no one better understands this than Bosso His book is both important and timely Jeffrey M Berry author of *The New Liberalism The Rising Power of Citizen Groups* A must read for anyone interested in the future of our environment Frank R Baumgartner coauthor of *Basic Interests The Importance of Groups in Politics and in Political Science* An important engaging and well written book that s ideal for courses in environmental politics Robert J Duffy author of *The Green Agenda in American Politics New Strategies for the Twenty First Century* A masterful study that fills a critical void in the field Michael E Kraft author of *Environmental Policy and Politics* Publisher

Neopluralism Andrew S. McFarland, 2004 Many of the basic issues of political science have been addressed by pluralist theory which focuses on the competing interests of a democratic polity their organization and their influence on policy Andrew McFarland shows that this

approach still provides a promising foundation for understanding the American political process Rehnquist Justice Earl M. Maltz, 2003 With seven of its justices appointed by Republican presidents today's Supreme Court has significantly altered America's legal landscape since 1986 by tilting constitutional jurisprudence to the right That was the goal of Presidents Reagan and Bush in filling court vacancies and has been felt in cases related to federalism economic rights and affirmative action However liberal issues such as abortion have moved only marginally to the right while rulings by the Court on school prayer and gay rights have moved constitutional doctrine slightly to the left In this collection of original articles prominent constitutional scholars are joined by new voices from the cutting edge of academia to subject the Rehnquist Court to closer scrutiny and to show that its brand of conservatism is less extreme than many have supposed Reflecting views across the political spectrum the contributors help readers understand the Court dynamic its constrained conservatism and the forces that shape constitutional law in general As these authors show the overall pattern of decision making in the Rehnquist era cannot be attributed to any single unified approach to constitutional analysis Instead today's Court can only be understood as the product of a complex interaction among individual justices each with an idiosyncratic view of the proper interpretation of the Constitution and the role of the Court in the American political system These provocative essays are designed to provide readers with insight into this interaction by focusing on each member of the bench From the staunch conservatism of Clarence Thomas to the accommodationism of Sandra Day O'Connor to the liberal constitutionalism of David Souter the essays analyze the unique approach of each justice to interpreting the Constitution They also show that the current justices are the product of a nomination and confirmation process that has undergone a major transformation in recent decades one which favors experienced often unknown jurists over high profile public servants By concentrating attention on its members Rehnquist Justice allows us to better understand the Supreme Court as a whole And by assessing today's judiciary in light of a public philosophy that looks askance at government it shows us that the Supreme Court has truly become a mirror of its times

NGOs in International Politics Shamima Ahmed, David M. Potter, 2006 Non governmental organizations have gained a great deal of popularity in recent years The awarding of the Nobel Prize to The International Campaign to Ban Landmines in 1997 and to Medicins Sans Frontieres in 1999 has highlighted the emergence of these organizations as new forces in international politics Yet there is no work to date that has provided an overview of the varieties of interaction between NGOs and states international organizations and in international politics This is especially true of books aimed at undergraduates NGOs in International Politics surveys a range of NGO activities and relationships in a manner accessible to students in the classroom Despite the gap in the textbook literature non governmental organizations are being taught in undergraduate courses either in theoretical terms or as components of service learning This book is designed to remedy the gap between interest in NGOs and accessible literature for use in the classroom **Crime, Violence, and Democracy**

Enrique Desmond Arias, 2001 *Demanding Accountability* Dana Clark, Jonathan Fox, Kay Treakle, 2003 *Demanding*

Accountability is a collection of nine original case studies that offer insights into how local national and international civil society factors mobilize to hold the World Bank accountable for its financed projects. It is a rich source of lessons for understanding today's emerging transnational civil society efforts to challenge powerful global institutions. *International Institutions* Judith L. Goldstein, Richard H. Steinberg, 2010-01-28. Sovereign nations share the international system with a host of non-state transnational actors. Some of these entities have been created by states themselves, often as a result of the need to jointly solve a common problem, such as the United Nations. Other international entities are created when members of a society organize across traditional national boundaries to deal with a collective concern, such as Amnesty International or Oxfam. To understand and explain contemporary world politics, we need to consider these institutions as key actors influencing issues of war and peace. Although transnational actors are not new on the world stage, the number and type of these international entities expanded dramatically after World War II. This set examines both the rise of these new transnational actors and their effect on international politics and policies. Volume One: Causes. Why Do International Institutions Exist? Volume Two: Consequences. When, Where, and Why? International Institutions are Effective. Volume Three: Types of Institutions. Security and Economic. Volume Four: Types of Institutions. Environment, Human Rights, International Courts, Multilateralism, Regionalism. **Armed Conflict in Africa** Carolyn Pumphrey, Rye Schwartz-Barcott, 2003-08-18. *Armed Conflict in Africa* offers a multidisciplinary look at the causes and remedies of armed conflict in Africa. It contains a collection of essays written by leading African Studies scholars and designed for both the student and practitioner alike.
