

## ACID-BASE STUDY GUIDE- written questions

**Written Section:** The questions below represent provincial exam questions(written) from Provincial Examinations in Chemistry dating back to Jan/94to April 2000. It is important to do as many question types as possible. Once you have familiarized yourself with a particular type of problem and are confident in your abilities to solve it, signify it by placing checkmark on your INTENDED LEARNING OUTCOMES handout for this section. Good Luck!

### SUGGESTIONS FOR MAXIMIZING USE OF THIS GUIDE:

- Do all of the questions in this guide!!!
- This guide contains all the questions from Provincial Exams dating back to Jan/94. Some sections are bigger than others in regards to questions asked....you should be intimately familiar with "repeat questions".
- Compare your fully worked out solutions against the key provided, paying attention to how marks are awarded for each type of question.

**Critical Care Study Guide** Gerard J. Criner, Gilbert E. D'Alonzo, 2013-03-09 Critical care medicine is a dynamic and exciting arena where complex pathophysiologic states requiring extensive knowledge and clinical acumen are commonly found. Caring for critically ill patients requires an extensive knowledge of basic pathophysiology as well as awareness of the appropriate diagnostic tests and therapeutic interventions. Because this knowledge base crosses many different disciplines, introduction to caring for the intensive care patient while exciting may also be intimidating. This textbook is designed toward making the dynamic environment of the critical care unit understandable and the approach to the patient both logical and successful. The book contains three components: 1. description of the procedural tasks commonly performed for the critically ill patient; 2. explanation of the most common pathophysiologic states encountered; and 3. description of specific disease entities with details of their differential diagnosis, diagnostic strategy, and therapeutic plan. This book also uses several educational approaches that we have found useful in our own teaching sessions and prior textbooks. Clinical cases introduce chapters and highlight chapter segments to emphasize clinical relevancy. As an additional study aid, margin notes highlight important teaching points and facilitate easy review of chapter content. To consolidate the principles outlined in each chapter, review questions with full text explanations are provided at the end of each chapter. All these elements help reinforce the most important messages for the reader.
