Acog Guidelines For Pap Smears 2012

Amanda Hess, Jeremy Hess

Acog Guidelines For Pap Smears 2012:

Obstetric Clinical Algorithms Errol R. Norwitz, George R. Saade, Hugh Miller, Christina M. Davidson, 2016-12-19 Clinical management algorithms for common and unusual obstetric problems have been developed to help guide practitioners to the best treatment options for patients. In this quick reference guide, clear diagrams and concise notes show treatment options and evidence for over 80 high risk obstetric complications presented in two page full color spreads to promote quick decision making in time pressed situations. This new edition includes sections on obesity, late preterm and early term delivery and pregnancy termination. As a clinical manual, the book provides guidance to many common and less common obstetric situations in which either the mother or her fetus is at risk. An algorithm for each situation provides obstetric care providers with a step by step guide of necessary actions for any given clinical case. Written by internationally renowned experts, *Clinical Obstetric Algorithms* enables all obstetrics care providers to ensure delivery of a healthy mother and a healthy baby.

What Every Woman Should Know about Cervical Cancer Nenad Markovic, Olivera Markovic, 2016-12-19 This book, an updated and extended edition, is about mobilizing women and health care policy makers and providers to unite their efforts in a single strategy for fighting cervical cancer worldwide. The objective of this strategy would be to reverse cervical cancer prevalence and mortality rates among all 2.4 billion women at risk and to achieve this goal within 10-15 years of implementation. Cervical Cancer Screening Pap test VIA, VILI or HPV failed to stop cervical cancer worldwide simply because many countries could not afford developing infrastructure necessary to carry on the global strategy and because the outreach could not accomplish the targeted 51% of the population at risk. In 2015, there is still 600,000 women getting cervical cancer annually and 300,000 of them die. Every minute one woman gets cervical cancer and every 2 minutes one woman dies from this preventable disease. In 21st Century, the Information Technology (IT) Revolution has made substantial impact on medicine, enabling remote points of care scattered around the world to be e-connected with experts in distant medical centers and to obtain quality diagnosis and proper guidelines for curative therapy of early stages of cervical cancer. Low frequency of costly interventions needed makes IT-based screening financially and socially beneficial for mass screening. This new Mobile Health technology with the Global Strategy for Fighting Cervical Cancer is subject to elaboration in our book as the new hope when old efforts have failed to stop the world epidemics of this grave but preventable disease. The language is adapted for easy reading and understanding by professionals and lay persons. This book is intended for women at risk for cervical cancer, their health care providers, health insurance companies, government responsible for making health policy, and healthcare industry because all of them have special role in the new Global Strategy elaborated in details in this book.

Woman Designed by God Amanda Hess, Jeremy Hess, 2014-10-21 *Woman Designed by God* is written to challenge the healthcare industry's cover up attitude toward women. God designed a woman's body with a powerful innate capability to heal itself. So why does modern medicine leave women cut open, covered up, and heavily medicated when there is hope for a better way? The good news is this

book will help you learn how to make the right choices for your body In it you will learn about natural and holistic approaches to women s health It may change the entire way you view your body and how you take care of it We hope it does
