Acog Pap Guidelines 2013 Algorithm:

Obstetric Clinical Algorithms Errol R. Norwitz, George R. Saade, Hugh Miller, Christina M. Davidson, 2016-12-19 Clinical management algorithms for common and unusual obstetric problems have been developed to help guide practitioners to the best treatment options for patients. In this quick reference guide, clear diagrams and concise notes show treatment options and evidence for over 80 high-risk obstetric complications presented in two-page full-color spreads to promote quick decision making in time-pressed situations. This new edition includes sections on obesity, late preterm and early term delivery, and pregnancy termination. As a clinical manual, the book provides guidance to many common and less common obstetric situations in which either the mother or her fetus is at risk. An algorithm for each situation provides obstetric care providers with a step-by-step guide of necessary actions for any given clinical case. Written by internationally renowned experts, *Clinical Obstetric Algorithms* enables all obstetrics care providers to ensure delivery of a healthy mother and a healthy baby.

Thomas Cox, 2011-12-28 The first two editions of this book were published by the American Society for Colposcopy and Cervical Pathology (ASCCP). This product is considered the standard of colposcopy and has the reputation of being the best-selling educational teaching module for the physician resident or advanced practice clinician who wishes to bridge the gap between the obvious need for increased early detection of cervical, vaginal, and vulvar disease and the intensive education required for colposcopy. This includes the disciplines of pathology, cytology, cytogenetics, preventive medicine, basic research, gynecologic oncology, and endocrinology, which are relevant to the understanding of the pathophysiology of the disease processes of the lower genital tract. Features include 1815 color images, complete coverage of HPV-related diseases, colposcopy, and related topics. Chapters added on adolescents and the expanding field of anal screening, diagnosis of anal HPV-related precancer and cancer through high-resolution anoscopy, and treatment of anal and perianal neoplastic disease.
