Teaching Virtues Donald Trent Jacobs, Jessica Jacobs-Spencer, 2001-04-04 This book about teaching virtues is based on a fundamental American Indian view that sees the universe as intimate relationships of living things that are vitally affected by attributes called universal virtues. These virtues cross all boundaries and cannot be taught in isolation. They are woven into all subjects that are worth learning. Part 1 provides psychological perspectives that underpin the book's approach. Part 2 shows how various pedagogical strategies can turn subject matter into significant relationships. Since teaching virtues is ultimately about relationships a natural way to embed awareness of virtues unfolds when there is a consistent commitment to teaching virtues daily. Chapters introduce the lesson plan format and the conceptual model explore the meanings of vital terminology and discuss assessment strategies. Part 3 realizes the actual interconnections between virtues and content.
