*Indigenous Rights and Water Resource Management* Katie O'Bryan, 2018-10-26 In an era of climate change the need to manage our water resources effectively for future generations has become an increasingly significant challenge Indigenous management practices have been successfully used to manage inland water systems around the world for thousands of years and Indigenous people have been calling for a greater role in the management of water resources As First Peoples and as holders of important knowledge of sustainable water management practices they regard themselves as custodians and rights

holders deserving of a meaningful role in decision making This book argues that a key albeit not the only means of ensuring appropriate participation in decision making about water management is for such participation to be legislatively mandated To this end the book draws on case studies in Australia and New Zealand in order to elaborate the legislative tools necessary to ensure Indigenous participation consultation and representation in the water management landscape Our Social World Jeanne H. Ferris,Kemal Kirisci,2016-04-05 The massive dimensions of Syria s refugee crisis and the search for solutions The civil war in Syria has forced some 10 million people more than half the country s population from their homes and communities creating one of the largest human displacements since the end of World War II Daily headlines testify to their plight both within Syria and in the countries to which they have fled The Consequences of Chaos looks beyond the ever increasing numbers of Syria s uprooted to consider the long term economic political and social implications of this massive movement of people Neighboring countries hosting thousands or even millions of refugees Western governments called upon to provide financial assistance and even new homes for the refugees regional and international organizations struggling to cope with the demands for food and shelter all have found the Syria crisis to be overwhelming in its challenges And the challenges of finding solutions for those displaced by the conflict are likely to continue for years perhaps even for decades The Syrian displacement crisis raises fundamental questions about the relationship between action to resolve conflicts and humanitarian aid to assist the victims and demonstrates the limits of humanitarian response even on a massive scale to resolve political crises The increasingly protracted nature of the crisis also raises the need for the international community to think beyond just relief assistance and adopt developmental policies to help refugees become productive members of their host communities      **Initial Report Submitted by India Under Article 35 of the Convention** United Nations.
