*Teach Like It's Music* Doug Goodkin, 2019-12-08 How might we teach in a way that uplifts both the children and ourselves? How do we give a shape and design to our classes that refreshes and energizes? How might we create a musical flow and make our classes truly sing? Revealing the thinking behind his long teaching career working with both children and adults of all ages, internationally renowned music educator Doug Goodkin guides us to making music classes and any classes more memorable, magical, and musical. The ideas presented here will inspire all teachers to teach with more playfulness, passion, and purpose.

*Now's the Time* Doug Goodkin, 2004 This one-of-a-kind book combines practice theory, aesthetics, history, and a proven pedagogy in leading both children and adults in the joys of jazz. It features 70 activities for teachers to do with children based on the Orff approach to music education, a clear developmental sequence, and a thorough analysis of the basics of the blues, jazz standards, and improvisation. Activities are applicable to preschool, elementary, and middle school students and adaptable to any age. *The Child as Musician* Gary E. McPherson, 2015-09-24 The new edition of *The Child as Musician: A Handbook of Musical Development* celebrates the richness and diversity of the many different ways in which children can engage in and interact with music. It presents theory both cutting edge and classic in an accessible way for readers by surveying research.

concerned with the development and acquisition of musical skills. The focus is on musical development from conception to late adolescence although the bulk of the coverage concentrates on the period when children are able to begin formal music instruction from around age 3 until the final year of formal schooling around age 18. There are many conceptions of how musical development might take place just as there are for other disciplines and areas of human potential. Consequently the publication highlights the diversity in current literature dealing with how we think about and conceptualise children's musical development. Each of the authors has searched for a better and more effective way to explain in their own words and according to their own perspective the remarkable ways in which children engage with music. In the field of educational psychology there are a number of publications that survey the issues surrounding child and adolescent development. Some of the more innovative present research and theories and their educational implications in a style that stresses the fundamental interplay among the biological, environmental, social and cultural influences at each stage of a child's development. Until now no similar overview has existed for child and adolescent development in the field of music. *The Child as Musician* addresses this imbalance and is essential for those in the fields of child development, music education and music cognition.
