*ICEL 2018 13th International Conference on e-Learning* Professor Eunice Ivala,2018-07-05    *International Taxation of Income from Services under Double Taxation Conventions* Marta Castelon,2016-04-24 The provision of international services has increased enormously mainly due to the precipitous growth of the digital economy Accordingly the interpretation and application of double taxation conventions DTCs to income from services has become a dominant focus in the international taxation This multiple award winning book is an indispensable tool for practitioners and a major contribution to the debate about tax reform It responds to the need for a comprehensive overview of the tax opportunities and risks relating to the provision of international services It also offers the rst in depth

analysis of the taxation of income from services vis vis the multilateral instrument MLI resulting from the OECD's Base Erosion and Profit Shifting BEPS initiative. With a thorough analysis of the international taxation of income from services over the last two centuries, the author sheds new light on present tax policy debates and develops workable proposals for bringing brick and mortar DTCs into the digital reality. With an abundance of case studies, treaty interpretations, appraisals of policy discussions and practical solutions, the author examines every aspect of the subject, including the following: the Model DTCs of the OECD, the United Nations, Germany and the United States; their similarities and differences; relationships among the MLI, the Model DTCs and specific DTCs; development of the provisions dealing with services in the DTCs; how tax authorities and courts of different countries (e.g. the United States, Germany, Brazil, India and China) apply DTC provisions on the taxation of international services; opportunities and risks relating to different business practices such as the subcontracting of services, provisions for hiring out of labour, the secondment of employees and the engagement of contract and toll manufacturers; practical questions about the taxation of different distribution models, from fully edged distributors to commissionaires; challenges and proposals relating to the differentiation between various types of services under DTCs; the permanent establishment concept; to what extent the structure, purposes and scope of DTCs differ from those of the General Agreement on Trade in Services (GATS); how changes in the US Model DTC of 2016 affect international service provisions; and proposed changes to amending the OECD and UN Model DTCs. Viable proposals to simplify DTC provisions dealing with service income and align them with current challenges such as the digital economy and the increasing volume of remote services are offered, particularly in light of the likely impact of the BEPS package and its subsequent MLI. This book is poised to become one of the key practice resources for tax lawyers, in-house counsel and policymakers in the coming years.

Interested academics too will benefit from the author's skill in recognizing the ongoing role of taxation fundamentals in the major revolution currently underway.

**Museum and Gallery Publishing** Sarah Hughes, 2019-06-20

Museum and Gallery Publishing examines the theory and practice of general and scholarly publishing associated with museum and art gallery collections. Focusing on the production and reception of these texts, the book explains the relevance of publishing to the cultural, commercial and social contexts of collections and their institutions. Combining theory with case studies from around the world, Sarah Anne Hughes explores how, why and to what effect museums and galleries publish books. Covering a broad range of publishing formats and organisations, including heritage sites, libraries and temporary exhibitions, the book argues that the production and consumption of printed media within the context of collecting institutions occupies a unique and privileged role in the creation and communication of knowledge. Acknowledging that books offer functions beyond communication, Hughes argues that this places books published by museums in a unique relationship to institutions, with staff acting as producers and visitors as consumers. The logistical and ethical dimensions of museum and gallery publishing are also examined in depth, including consideration of issues such as production, the impact of digital technologies, funding and

sponsorship marketing co publishing rights and curators and artists agency Focusing on an important but hitherto neglected topic Museum and Gallery Publishing is key reading for researchers in the fields of museum heritage art and publishing studies It will also be of interest to curators and other practitioners working in museums heritage and science centres and art galleries

**The Hegemon's Tool Kit** Rebecca Davis Gibbons,2022-07-15 At a moment when the nuclear nonproliferation regime is under duress Rebecca Davis Gibbons provides a trenchant analysis of the international system that has for more than fifty years controlled the spread of these catastrophic weapons The Hegemon's Tool Kit details how that regime works and how disastrously it might falter In the early nuclear age experts anticipated that all technologically capable states would build these powerful devices That did not happen Widespread development of nuclear arms did not occur in large part because a global nuclear nonproliferation regime was created By the late 1960s the United States and the Soviet Union had drafted the Treaty on the Non Proliferation of Nuclear Weapons NPT and across decades the regime has expanded with more agreements and more nations participating As a result in 2022 only nine states possess nuclear weapons Why do most states in the international system adhere to the nuclear nonproliferation regime The answer lies Gibbons asserts in decades of painstaking efforts undertaken by the US government As the most powerful state during the nuclear age the United States had many tools with which to persuade other states to join or otherwise support nonproliferation agreements The waning of US global influence Gibbons shows in The Hegemon's Tool Kit is a key threat to the nonproliferation regime So too is the deepening global divide over progress on nuclear disarmament To date the Chinese government is not taking significant steps to support the nuclear nonproliferation regime and as a result the regime may face a harmful leadership gap
