Interface Between Chemistry And Biochemistry:

Interface between Chemistry and Biochemistry P. Jolles, H. Jörnvall, 2011-09-20 The developing importance of the interface between chemistry and biology is probably the largest change to have occurred in chemistry in the past 15 years. Increasingly more chemists work on problems dealing with biology and interfacial research is poised to move into the main stream of both disciplines. This merging of two types of approach has resulted in a vigorous research discipline with unprecedented potential to address important biological and chemical problems. A series of examples is developed in this book. Analytical aspects are discussed in several chapters. Fundamental concepts do not only derive from chemistry but chemistry has provided biochemistry with powerful tools of analysis. Equally important physicochemical methods allow studies of nucleic acids and lipids, lipases, receptors and other membrane proteins. Several chapters deal with enzymes in different contexts. The part devoted to metalloproteins is directed toward zinc metallochemistry and NMR structural work on zinc proteins. Chemists have been able to bring to biology their characteristic approach of synthesizing new molecules. These aspects are treated in chapters devoted to glycopeptides and uses of peptides as probes. Further fields of interest in combining different disciplines concern novel active compounds such as surfactant peptides and catalytic antibodies in studies resulting from close collaboration between chemists and biochemists.

Literature Of Analytical Chemistry

Tibor Braun, Ernő Bujdosó, András Schubert, 2019-06-04 First Published in 1987 this book offers a full comprehensive guide into the Literature on Analytical Chemistry. Carefully compiled and filled with a vast repertoire of journals, Papers and References this book serves as a useful reference for Students of Chemistry and other practitioners in their respective fields.

Interfaces Between Nanomaterials and Microbes Munishwar Nath Gupta, Sunil Kumar Khare, Rajeshwari

Sinha, 2021-06-23 Nanomaterials are becoming ubiquitous, microbes similarly are everywhere. This book focuses on various ways the diverse nanomaterials interact with microbial communities and implications of such interactions. Both toxicity and beneficial effects of nanomaterial-microbe interactions have been covered. This includes areas such as fate and bioavailability of nanomaterials in environments, microbial synthesis of nanomaterials and antimicrobial action of nanomaterials. Fairly comprehensive but with narrow focus the book provides useful insights into these interactions which need to be factored in while designing nanoscience based new technologies.

Interaction of Food Macromolecules Ibrahim Khalifa, Zou Xiaobo, Soottawat Benjakul, 2025-10-06 Interaction of Food Macromolecules The Matrix of Future Foods provides a detailed understanding on why biological macromolecules i e proteins lipids and carbohydrates with ligands interactions are essential to understanding biology at the molecular level The book aims to create a multidisciplinary forum of discussion on the interaction between macromolecules and ligands providing an understanding on how biological macromolecules with ligands interactions are central to facilitating the discovery design and development of future functional foods In addition it outlines information available on the macromolecules ligands interaction that happens inside the food matrixes and inside our bodies Knowing about the mechanisms responsible for the macromolecules ligands recognition and binding facilitates the discovery design and development of future and functional foods Discusses how the interaction between macromolecules and ligands facilitates the discovery design and development of future functional foods Shows how macromolecules can affect foods stability functionality physicochemical behaviors and bioavailability Outlines how binding models such as lock and key induced fit and conformational selection of macromolecule ligands affect the overall properties of food and foodstuffs
