

## Towards sustainable management of land and soil

European land and soil face a number of pressures, including urban expansion, consequences from agriculture and industry, soil sealing, landscape fragmentation, low crop diversity, soil erosion and extreme weather events linked to climate change.

Response plans with cleaner energy and transport systems, a green infrastructure connecting green areas, less intensive sustainable agricultural practices can help make Europe's land and soil more sustainable and soil health.

*Landscape and the Intermontane Northwest* William G. Robbins,Donald W. Wolf,1994

**When Money Grew on Trees** Greg Gordon,2014-04-02 Born in the timber colony of New Brunswick Maine in 1848 Andrew Benoni Hammond got off to an inauspicious start as a teenage lumberjack By his death in 1934 Hammond had built an empire of wood that stretched from Puget Sound to Arizona and in the process had reshaped the American West and the nation s way of doing business When Money Grew on Trees follows Hammond from the rough and tumble world of mid nineteenth century New Brunswick to frontier Montana and the forests of Northern California from lowly lumberjack to unrivaled timber baron Although he began his career as a pioneer entrepreneur Hammond unlike many of his associates successfully negotiated the transition to corporate businessman Against the backdrop of western expansion and nation

building his life dramatically demonstrates how individuals more than the impersonal forces of political economy shaped capitalism in this country and in doing so transformed the forests of the West from functioning natural ecosystems into industrial landscapes. In revealing Hammond's instrumental role in converting the nation's public domain into private wealth historian Greg Gordon also shows how the struggle over natural resources gave rise to the two most pervasive forces in modern American life: the federal government and the modern corporation. Combining environmental, labor and business history with biography, *When Money Grew on Trees* challenges the conventional view that the development and exploitation of the western United States was dictated from the East Coast. The West, Gordon suggests, was perfectly capable of exploiting itself and in his book we see how Hammond and other regional entrepreneurs dammed rivers, logged forests and leveled mountains in just a few decades. Hammond and his like also built cities, towns and a vast transportation network of steamships and railroads to export natural resources and import manufactured goods. In short, they established much of the modern American state and economy. The Pacific Raincoast, Robert Bunting, 1997. This work chronicles the struggle for the Douglas fir region from the first sustained contact between native American and Euro American cultures to 1900 when Fredrick Weyerhaeuser's purchase of some of the area completed one of the largest land deals in US history. Colony and Empire, William G. Robbins, 1994. Popular writers and historians alike have perpetuated the powerful myth of the rugged individualist single handedly transforming the American West. In reality, William Robbins counters, it was the Guggenheims and Goulds, the Harrimans and Hearsts and the Morgans and Mellons who masterminded what the West was to become. Remove the romance he shows and a darker West emerges: a colonial like region where industrial statesmen aided by eastern, US and European capital manipulated investments in pursuit of private gain while controlling wage earning cowboys and miners. Robbins argues that understanding the impact of capitalism on the West from the fur trade era to the present is essential to understanding power, influence and change in the region. Showing how global capitalism had a more profound impact on the modern West than individual initiative, he explores violence and racism along the Texas Mexican border, colonial style company towns in Montana and the Northwest, contrasting traditions astride the US Canadian boundary, pace setting agribusiness and exploitation of labor in California, the growing power of metropolitan centers and dependence of rural areas and the emergence of a sizable federal influence. To grasp the essence of the West's dramatic transformation, Robbins contends, you must look to the mainstays of material relations in the region, the perpetually changing character of political and economic culture, the inherent instability of resources and the larger constellations of capitalist decision making. Consequently, he shows, Western success and failure, prosperity and misfortune and expansion and decline were all inseparably linked to the evolution of capitalism at the local, regional, national and global levels. In the tradition of Patricia Nelson Limerick's *Legacy of Conquest*, Robbins's study challenges some of our most revered images of the West and invigorates the ongoing debates over its history and meaning for our nation. Red Lodge and the Mythic West, Bonnie

Christensen,2002 Tracing the story of Red Lodge from the 1880s to the present Christensen tells how a mining town managed to endure the vagaries of the West s unpredictable extractive industries economy She connects Red Lodge to a myriad of larger events and historical forces to show how national and regional influences have contributed to the development of local identities exploring how and why westerners first rejected and then embraced western images and how ethnicity wilderness and historic preservation became part of the identity that defined one town **BOOK JACKET Trails**
