It reports on important theoretical and practical issues covering a wealth of topics including aesthetics in product and system design, design-driven innovation, affective computing, evaluation tools for emotion, Kansei engineering for products and services, and many more. This timely survey addresses experts and industry practitioners with different backgrounds such as industrial designers, emotion designers, ethnographers, human computer interaction researchers, human factors engineers, interaction designers, mobile product designers, and vehicle system designers. This target group allows Lisa Paisley-Cleveland to examine the BIM phenomenon outside the poverty paradigm and issues attached to teenage pregnancy as well as to explore contributing factors attached to the persistent black and white disparity in infant mortality rates which, according to CDC's January 2013 report, are 12.40 and 5.35 respectively. This book raised the following question: given the disparity in the infant mortality rates among middle-class black and white women, are there factors attached to the pregnancy experience of middle-class black women that could help us understand the adverse birth outcomes for this target group? While investigating the answer to this question, Paisley-Cleveland provides readers entry into the pregnancy experiences of eight women from pregnancy planning to infant loss, and the book examines feelings, events, circumstances, interactions, behaviors, culture, and history embedded in their pregnancy stories to explicate possible factors connected to adverse birth

outcomes It links the women s personal stories to clinical and psychosocial factors placing their experiences at the center of the research and demystifying assumptions The study s narratives and conclusions are built into a literary structure which helps to make a complex subject relatable and understandable to a wide audience *Black Middle Class Women and Pregnancy Loss* will be an invaluable resource for medical professionals professionals in public health mental health and social work sociologists and anyone working or invested in women s health **Innovations in Healthcare Design** Sara O.
