Annual Catalog of the Western University of Pennsylvania, Year Ending ... University of Pittsburgh, Western University of Pennsylvania, 1921 Supporting Learning Flow Through Integrative Technologies Tsukasa Hirashima, Ulrich Hoppe, Shelley Shwu-Ching Young, 2007 Contains a range of issues related to using information technology for learning This book indicates a move from local support of specific learning activities towards supporting learning and teaching processes in a broader context beyond single tools and individuals users considering user learner groups on different levels of granularity

Catalog St. Ambrose College, 1929 Algebraic Semantics of Imperative Programs Joseph Goguen, Grant Malcolm, 1996 Algebraic Semantics of Imperative Programs presents a self contained and novel executable introduction to formal reasoning about imperative programs The authors primary goal is to improve programming ability by improving intuition about what programs mean and how they run The semantics of imperative programs is specified in a formal implemented notation the language OBJ this makes the semantics highly rigorous yet simple and provides support for the mechanical verification of program properties OBJ was designed for algebraic semantics its declarations introduce symbols for sorts and functions its statements are equations and its computations are equational proofs Thus an OBJ program is an equational theory and every OBJ computation proves some theorem about such a theory This means that an OBJ program used for defining the semantics of a program already has a precise mathematical meaning Moreover standard techniques for mechanizing equational reasoning can be used for verifying axioms that describe the effect of imperative programs on abstract machines These axioms can then be used in mechanical proofs of properties of programs Intended for advanced undergraduates or beginning graduate students Algebraic Semantics of Imperative Programs contains many examples and exercises in program verification all of which can be done in OBJ *The Catalogue of Purdue University 1948-1949 and 1949-1950*, 1949

The Strong Sylow Theorem for the Prime p in Projective Special Linear Locally Finite Groups - Part 3 of a Trilogy Dipl.-Math. Felix F. Flemisch, 2023-03-30 In Part 3 of the Trilogy Characterising Locally Finite Groups Satisfying the Strong Sylow Theorem for the Prime p About the Strong Sylow Theorem for the Prime p in Simple Locally Finite Groups The Strong Sylow Theorem for the Prime p in Projective Special Linear Locally Finite Groups we continue the program begun in 10 to optimise along the way 1 its beautiful Theorem about the first type An of infinite families of finite simple groups step by step to further types by proving it for the second type A PSL n We start with proving the Conjecture 2 of 10 about the General Linear Groups over commutative locally finite fields stating that their rank is bounded in terms of their p uniqueness and then break down this insight to the Special Linear Groups and the Projective Special Linear PSL Groups over locally finite fields We close with suggestions for future research regarding the remaining five rank unbounded types the Classical Groups and the way 2 regarding the locally finite and p soluble groups and regarding Augustin Louis Cauchy's and Variste
