Allhoff, 2008-03-22 This paper offers a brief examination of ethical health issues arising from military operations and outlines which if any of these ethical health issues apply to current Australian Defence Force ADF military operations The transparency of military operations provided through real time global media reporting and the Internet has raised public awareness of incidents that can be viewed broadly as ethical issues or dilemmas While many of these issues are not new it is the changing context of post cold war military operations and scale and demand of humanitarian operations that places new requirements on how the ADF best addresses these potential issues before they become critical incidents In identifying potential ethical issues arising from military health operations it is recognized that military health personnel operate within a

command and control organizational structure and associated culture It is also recognized that the complexity of the issues and the environment within which military health personnel are expected to operate will raise ethical health issues not likely to be encountered to the same degree by those health practitioners operating in the average suburban practice or hospital except when health personnel are confronted with large scale emergencies such as those encountered with recent terrorist attacks and massacres     *Proceedings of Share Share Inc,1978*     *Flying Magazine ,1973-01*     *Oracle ADF Survival Guide* Sten Vesterli,2017-09-04
