We're pleased to introduce the third edition of Lippincott Williams Wilkins Administrative Medical Assisting, the medical assisting text designed to address the challenges of medical assisting faculty and to provide the necessary content for programs that address administrative skills separately from clinical skills. This dynamic package of text and resources represents more than just a textbook; instead, providing a suite of learning resources. This is the one text aimed at making sure that every graduate can quickly change their cap and gown for a set of scrubs and immediately be a vital member of the medical office. We do this by providing the content in an engaging style that speaks to students. Putting pedagogy to work in the text through key features like patient education boxes, competency checklists, procedure boxes, etc. Constantly reinforcing the learning through additional online ancillaries such as games and activities, animations, and ESL resources to round out the experience. Helping instructors lessen planning time with robust instructor resources. Competency mapping tools help faculty members and students track their progress through the material. New content in the third edition focuses on addressing crucial changes in policy and technology. Without changing the engaging writing style we're known for, we've made sure that the content is up-to-date and in line with the needs of the market. We've added content on emergency preparedness, a crucial topic in today's medical office. In addition, instructors will be happy to find the latest CAAHEP and ABHES competencies clearly addressed throughout the text.
