

A PEOPLE'S HISTORY OF SCIENCE

A stylized, high-contrast illustration of two miners in a mine. The miner in the foreground is wearing a yellow hard hat and a grey shirt, holding a pickaxe. The miner in the background is wearing a blue hard hat and a blue shirt, also holding a pickaxe. The background is filled with geometric shapes in yellow, blue, and red, suggesting a mine environment.

Thomas Nail

A Peoples History Of Science Miners Midwives And Low Mechanicks:

A People's History of Science Clifford Conner, 2005-11-08 Challenges popular beliefs that credit such figures as Galileo Newton and Einstein with bringing about modern science explaining how everyday laborers participated in creating science and continue to do so today in an account that also documents how the development of science affects ordinary people

Original Theory of the Object Thomas Nail, 2021-08-20 e Throughout the history of science and technology objects have been understood in many ways but rarely have they been understood to play an active role in the production of knowledge This has led to largely anthropocentric theories and histories of science which treat nature as passive objects viewed by independent observers Thomas Nail approaches the theory of objects historically in order to tell a completely new story in which objects themselves are the true agents of scientific knowledge They are processes not things It is the first history of science and technology from prehistory to the present to illuminate the agency knowledge and mobility of objects e e Nail s view of the object can be characterized as e change is the only constante to quote those who have gone before Nail Univ of Denver sets out to convince readers that reality is not a stable essentialist subject object dichotomy but rather a materialist process of kinetic historical progression That said Nail s writing style is generally approachable so even readers not drawn to academic philosophy of science might find this an interesting read e *Cultural Histories of the Material World* Peter N. Miller, 2013-07-23 All across the humanities fields there is a new interest in materials and materiality This is the first book to capture and study the material turn in the humanities from all its varied perspectives Cultural Histories of the Material World brings together top scholars from all these different fields from Art History Anthropology Archaeology Classics Folklore History History of Science Literature Philosophy to offer their vision of what cultural history of the material world looks like and attempt to show how attention to materiality can contribute to a more precise historical understanding of specific times places ways and means The result is a spectacular kaleidoscope of future possibilities and new perspectives [Divining Science](#) Warren Dym, 2010-09-24 The study of German mining and metallurgy has focused overwhelmingly on labor capitalism and progressive engineering and earth science This book addresses prospecting practices and mining culture Using the divining or dowsing rod as a means of exposing miner beliefs it argues that a robust vernacular science preceded institutionalized geology in Saxony and that the Freiberg Mining Academy f 1765 became a site for the synthesis of tradition and new science The tacit knowledge of dowsing was the mark of the experienced prospector and rather than decline in importance through the Enlightenment the practice transformed from a study of mineral vapors into an experimental branch of geophysics Mining administrations openly hired practitioners through the eighteenth century **Creative Actions and Organizations** Simone D'Alessandro, 2020-12-09 This book details a 15 year theoretical and practical research study that destroys the clich s of creative processes and inaugurates a reflective sociology on serendipity In today s highly innovative organizations creative processes are proceduralized in the form of techniques and give rise to routine phenomena This text

hybridizes paradigms such as Donati's relational sociology the Luhmanian systemic approach Von Foerster's radical constructivism Sennett's ideas on the craftsman the ideas of Wittgenstein and Searle on language and the ideas of Dummett and Goedel on logic as well as Hofstadter's on artificial intelligence Drawing on over 600 works including essays and articles the currents of thought of scholars who have dealt with the topic are identified here The 200 techniques surveyed present common elements such as common meta rules of opposition combination and separation that determine creative behavior and are triggered by a recursive but paradoxical relationship between thought and language *Tinkering* Curt Gabrielson, 2013-09-17 After school and out of school programs as well as home schooling have been growing steadily for nearly a decade but instructors are still searching for high interest content that ties into science standards without the rigidity of current classroom canon The author draws on more than 20 years of experience doing hands on science to facilitate tinkering learning science while fooling around with real things In this book you'll learn Tinkering techniques in key science areas How to let kids learn science with hands on tinkering Engaging techniques for science learning at home in school or at a makerspace or library Step by step instructions for activities that don't end with a single project but that provide many paths for tinkering forward Multicultural Science Education Mary M. Atwater, Melody Russell, Malcolm B. Butler, 2013-11-19 This book offers valuable guidance for science teacher educators looking for ways to facilitate preservice and inservice teachers pedagogy relative to teaching students from underrepresented and underserved populations in the science classroom It also provides solutions that will better equip science teachers of underrepresented student populations with effective strategies that challenge the status quo and foster classrooms environment that promotes equity and social justice for all of their science students Multicultural Science Education illuminates historically persistent yet unresolved issues in science teacher education from the perspectives of a remarkable group of science teacher educators and presents research that has been done to address these issues It centers on research findings on underserved and underrepresented groups of students and presents frameworks perspectives and paradigms that have implications for transforming science teacher education In addition the chapters provide an analysis of the socio cultural political consequences in the ways in which science teacher education is theoretically conceptualized and operationalized in the United States The book provides teacher educators with a framework for teaching through a lens of equity and social justice one that may very well help teachers enhance the participation of students from traditionally underrepresented and underserved groups in science technology engineering and mathematics STEM areas and help them realize their full potential in science Moreover science educators will find this book useful for professional development workshops and seminars for both novice and veteran science teachers Multicultural Science Education Preparing Teachers for Equity and Social Justice directly addresses the essential role that science teacher education plays for the future of an informed and STEM knowledgeable citizenry The editors and authors review the beginnings of multicultural science education and then highlight findings from studies on

issues of equity underrepresentation cultural relevancy English language learning and social justice The most significant part of this book is the move to the policy level providing specific recommendations for policy development implementation assessment and analysis with calls to action for all science teacher educators and very significantly all middle and high school science teachers and prospective teachers By emphasizing the important role that multicultural science education has played in providing the knowledge base and understanding of exemplary science education Multicultural Science Education Preparing Teachers for Equity and Social Justice gives the reader a scope and depth of the field along with examples of strategies to use with middle and high school students These classroom instructional strategies are based on sound science and research Readers are shown the balance between research based data driven models articulated with successful instructional design Science teacher educators will find this volume of great value as they work with their pre service and in service teachers about how to address and infuse multicultural science education within their classrooms For educators to be truly effective in their classrooms they must examine every component of the learning and teaching process Multicultural Science Education Preparing Teachers for Equity and Social Justice provides not only the intellectual and research bases underlying multicultural studies in science education but also the pragmatic side All teachers and teacher educators can infuse these findings and recommendations into their classrooms in a dynamic way and ultimately provide richer learning experiences for all students Patricia Simmons North Carolina State University Raleigh USA This provocative collection of chapters is a presentation in gutsiness Ingenious in construction and sequencing this book will influence science teacher educators by introducing them to issues of equity and social justice directly related to women and people of color The authors unflinchingly interrogate issues of equity which need to be addressed in science education courses This provocative collection of chapters is a presentation in gutsiness Ingenious in construction and sequencing this book will influence science teacher educators by introducing them to issues of equity and social justice directly related to women and people of color The authors unflinchingly interrogate issues of equity which need to be addressed in science education courses It begins with setting current cultural and equity issue within a historic frame The first chapter sets the scene by moving the reader through 400 years in which African American s were scientifically excluded from science This is followed by a careful review of the Jim Crow era an analysis of equity issues of women and ends with an examination of sociocultural consciousness and culturally responsive teaching Two chapters comprise the second section Each chapter examines the role of the science teacher in providing a safe place by promoting equity and social justice in the classroom The three chapters in the third section focus on secondary science teachers Each addresses issues of preparation that provides new teachers with understanding of equity and provokes questions of good teaching Section four enhances and expands the first section as the authors suggest cultural barriers the impact STEM engagement by marginalized groups The last section composed of three chapters interrogates policy issues that influence the science classroom Molly Weinburgh Texas Christian University Fort

Worth USA **Agitation with a Smile** Stephen Bird,Adam Silver,Joshua C. Yesnowitz,2015-11-17 Agitation with a Smile offers a reappraisal of Howard Zinn s political thought and situates his efforts in a contemporary context looking toward the nature of activism and dissent in the future This is the first book to provide a substantive account and assessment of Zinn s philosophy and approach to collective action and to a larger extent democracy The contributors to this book explore the most effective mechanisms by which to arouse public support for seemingly radical positions and how current technological advancements may alter our perception of Zinn s activism The book is a valuable guide to a new generation of activists and scholars of politics in gauging the lasting relevance and legacy of Zinn s ideals concepts and methodology The text is neither fawning nor unduly critical unlike many discussions of Zinn in popular culture Rather the contributors engage the various complexities and tensions present throughout Zinn s work and subject them to contemporary assessment This is a multidisciplinary and international approach to Howard Zinn s intellectual and activist canon *Scapegoat* Clare Follmann,2026-03-03 The problem with invasive species is a problem of capitalism A caste of plants and animals labeled invasive are villainized as primary drivers of habitat degradation that must be eradicated at any cost an ethically fraught and often futile approach Fanatical intervention efforts lay waste to local ecosystems yet this outdated narrative of species management persists in both public belief and conservation policy distracting from and even justifying a far greater threat to biodiversity the global capitalist system that is destroying our planet Drawing on environmental science and semiotics Scapegoat recounts how the rhetoric of war between native and invasive species provides cover for business and political interests and their social and ecological consequences In her clear eyed polemic Clare Follmann challenges received wisdom in light of the true ecological crisis we face The choice is simple we can have capital or we can have life *Book Review Index* ,2006 Every 3rd issue is a quarterly cumulation **Library Journal** Melvil Dewey,Richard Rogers Bowker,L.
