*A Practical Grammar of the Central Alaskan Yup'ik Eskimo Language* Steven A. Jacobson, 1995-12      **A Practical Grammar of the Central Alaskan Yup'ik Eskimo Language** Steven A. Jacobson, Anna W. Jacobson, 1995 The native language of Eskimo people who live in the coastal and inland regions of the Lower Yukon Kuskokwim and Bristol Bay areas of Southwestern Alaska is presented in this grammar of Central Yup'ik. Written in a clear, concise and readable style, this volume is not only a comprehensive textbook for students but also a complete reference guide. It takes the student from beginning lessons to an advanced grammatical level. It is appropriate for the college and high school levels and for self study.      A practical grammar of the central Alaskan Yup'ik Eskimo language Steven A. Jacobson, Anna W. Jacobson, 1995      **Workbook**, 2019 This book is a companion to *A Practical Grammar of the Central Alaskan Yup'ik Language* by Steven A. Jacobson with *Yup'ik Readings* by Anna W. Jacobson, copyright 1995.      **Variations on Polysynthesis** Marc-Antoine Mahieu, Nicole Tersis, 2009 This work is comprised of a set of papers focussing on the extreme polysynthetic nature of the Eskaleut languages which are spoken over the vast area stretching from Far Eastern Siberia on through the Aleutian Islands, Alaska and Canada as far as Greenland. The aim of the book is to situate the Eskaleut languages typologically in general linguistic terms, particularly with regard to polysynthesis. The degree of variation from more to less polysynthesis is evaluated within Eskaleut, Inuit, Yupik vs Aleut, even in previously insufficiently explored domains such as pragmatics and use in context, including language contact and learning situations and over typologically related language families such as Athabascan, Chukotko-Kamchatkan, Iroquoian, Uralic and Wakashan.      **The Languages of Native North America** Marianne Mithun, 2001-06-07 This book provides an authoritative survey of the several hundred languages indigenous to North America. These languages show tremendous genetic and typological diversity and offer numerous challenges to current linguistic theory. Part I of the book provides an overview of structural features of particular interest, concentrating on those that are cross-linguistically unusual or unusually well developed. These include syllable structure, vowel and consonant harmony, tone and sound symbolism, polysynthesis, the nature of roots and affixes, incorporation and morpheme order, case, grammatical distinctions of number, gender, shape, control, location, means, manner, time, empathy and evidence, and distinctions between nouns and verbs, predicates and arguments, and simple and complex sentences and special speech styles. Part II catalogues the languages by family, listing the location of each language, its genetic affiliation, number of speakers, major published literature and structural highlights. Finally, there is a catalogue of languages that have evolved in contact situations.      A Practical Grammar of the St. Lawrence Island/Siberian Yupik Eskimo Language Steven A. Jacobson, 1990 A grammar of the Yupik or Yuit language as spoken on St. Lawrence Island, Alaska and in Siberia, designed for teaching both speakers and non-speakers.      The Languages and Linguistics of Northern Asia Edward Vajda, 2024-03-04 *The Languages and Linguistics of Northern Asia: A Comprehensive Guide* surveys the indigenous languages of Asia's North Pacific Rim, Siberia and adjacent

portions of Inner Eurasia It provides in depth descriptions of every first order family of this vast area with special emphasis on family internal subdivision and dialectal differentiation Individual chapters trace the origins and expansion of the region s widespread pastoral based language groups as well as the microfamilies and isolates spoken by northern Asia s surviving hunter gatherers Separate chapters cover sparsely recorded languages of early Inner Eurasia that defy precise classification and the various pidgins and creoles spread over the region Other chapters investigate the typology of salient linguistic features of the area including vowel harmony noun inflection verb indexing also known as agreement complex morphologies and the syntax of complex predicates Issues relating to genealogical ancestry areal contact and language endangerment receive equal attention With historical connections both to Eurasia s pastoral based empires as well as to ancient population movements into the Americas the steppes taiga forests tundra and coastal fringes of northern Asia offer a complex and fascinating object of linguistic investigation

*Case Studies from Austronesia, the Pacific, the Americas, and Theoretical Outlook* Andrej Malchukov, Bernard Comrie, 2015-09-14 Earlier empirical studies on valency have looked at the phenomenon either in individual languages or a small range of languages or have concerned themselves with only small subparts of valency e g transitivity ditransitive constructions leaving a lacuna that the present volume aims to fill by considering a wide range of valency phenomena across 30 languages from different parts of the world The individual language studies each written by a specialist or group of specialists on that language and covering both valency patterns and valency alternations are based on a questionnaire reproduced in the volume and an on line freely accessible database thus guaranteeing comparability of cross linguistic results In addition introductory chapters provide the background to the project and discuss its main characteristics and selected results while a series of featured articles by leading scholars who helped shape the field provide an outside perspective on the volume s approach The volume is essential reading for anyone interested in valency and argument structure irrespective of theoretical persuasion and will serve as a model for future descriptive studies of valency in individual languages
