## **A Primer In Positive Psychology Oxford Positive Psychology Series:**

*A Primer in Positive Psychology* Christopher Peterson, 2006-07-27 Positive psychology is the scientific study of what goes right in life from birth to death and at all stops in between. It is a newly christened approach within psychology that takes seriously as a subject matter those things that make life most worth living. Everyone's life has peaks and valleys and positive psychology does not deny the valleys. Its signature premise is more nuanced but nonetheless important. What is good about life is as genuine as what is bad and therefore deserves equal attention from psychologists. Positive psychology as an explicit perspective has existed only since 1998 but enough relevant theory and research now exist concerning what makes life most worth living to fill a book suitable for a semester long college course. This is that book and it covers the topics of concern to this new field.

**Tools for Strengths-Based Assessment and Evaluation** Catherine Simmons, 2012-11-08 Traditionally assessment and evaluation have focused on the negative aspects or deficits of a client's presentation. Yet strengths, health, and those things that are going right in a person's life are key protective factors in the prevention and treatment of many mental health problems. Thus measuring strengths is an important component of a balanced assessment and evaluation process. This is the first compendium of more than 140 valid and reliable strengths-based assessment tools that clinicians, researchers, educators, and program evaluators can use to assess a wide array of positive attributes including well-being, mindfulness, optimism, resilience, humor, aspirations, values, sources of support, emotional intelligence, and much more. These tools provide a clear picture of an individual's strengths while being easy to complete, score, and interpret. The scales and instruments included are consistently formatted, are organized according to construct measures, and include tools for working with adults, couples, families, children, and special populations. They represent a wide range of theoretical approaches and were written by a diverse array of professionals including social workers, psychologists, nurses, physicians, and sociologists.

Partial List of Instruments: Adult Dispositional Hope Scale, Assessing Emotions Scale, Flourishing Scale, Five Facet Mindfulness Questionnaire, Positive States of Mind Scale, A Measure of Expectations for Partner, Multidimensional Sense of Humor Scale, Parenting Sense of Competence Scale, Personal Wellbeing Index, Proactive Coping Inventory, Psychological Empowerment Scale, Stress-Related Growth Scale, Social Wellbeing Scales, Wellness Beliefs Scale.
