## **Back To Darwin A Richer Account Of Evolution:**

**Back To Darwin** John B. Cobb,2008-02-04 This book provides a distinctive radical way beyond the quarrels between evolutionary science and Christian belief. Leading scientists, philosophers, and theologians critically discuss the metaphysical assumptions of neo-Darwinism and offer concrete ways of broadening mainstream evolutionary theory. Their open exchange, moderated by veteran process theologian John B. Cobb, presents a holistic case for evolution that both theists and nontheists can accept. Contributors: Francisco J. Ayala, Ian G. Barbour, Charles Birch, Philip Clayton, John B. Cobb Jr., John Greene, David Ray Griffin, A. Y. Gunter, John F. Haught, Lynn Margulis, Reg Morrison, Dorion Sagan, Jeffrey Schloss, Robert J. Valenza, Howard J. Van Till.

**Astrophilosophy, Exotheology, and Cosmic Religion** Andrew M. Davis, Roland Faber, 2024-01-22. Astrophilosophy, Exotheology, and Cosmic Religion. Extraterrestrial Life in a Process Universe applies Alfred North Whitehead's process philosophy and the associated process philosophies of Henri Bergson, Teilhard de Chardin, and others to the interdisciplinary layers of astrobiology, extraterrestrial life, and the impact of discovery. This collection, edited by Andrew M. Davis and Roland Faber, asks questions such as: How have process thinkers imagined universal creative evolution and its implications for philosophies, theologies, and religions beyond Earth? How might their claims as to the primacy of organism temporality, novelty, value, and mind enrich current discussions and debates across disciplines? As experts in their fields, the contributors are informed by but not limited to process conceptualities. The chapters not only advance recent discussions in astrobiology, cosmology, and evolution but also consider a constellation of philosophical topics from shared extraterrestrial knowledge and values to the possibilities or limitations afforded by AI technology, the Fermi Paradox, the Drake Equation, and the increasing need to nurture the cosmic dimensions of theological and religious traditions.

**Dysteleology** Michael Berhow, 2019-06-25. A common theological critique of intelligent design (ID) centers on the problem of dysteleology. This problem states that because there are clear examples of suboptimal design in biology, life is probably not the product of an engineer-like designer. If it were, then one could argue that the designer is less than fully competent. ID critic Francisco Ayala expresses this critique in the following question: If functional design manifests an Intelligent Designer, why should not deficiencies indicate that the Designer is less than omniscient or less than omnipotent? This book provides a philosophical analysis of two approaches to answering this question: one offered by Ayala and the other offered by William Dembski, a leading ID theorist.

**Evolution's Purpose** Steve McIntosh, 2012-10. Presents the author's view of the scientific story of our evolutionary origins to show how evolution's progressive generation of emergent value reveals a larger purpose within the process. He demonstrates how this purpose can be felt within each of us as the evolutionary impulse to make things better to grow toward ever-widening realizations of beauty, truth, and goodness. **Life and Process** Spyridon A. Koutroufinis, 2014-05-21. Alfred North Whitehead is arguably the most original 20th-century philosopher of nature and metaphysics. In recent decades, a number of physicists have produced groundbreaking new theories in fundamental physics influenced by his process.

philosophy In contrast few biologists are even aware that Whitehead's radical rethinking of the Cartesian assumptions implicit in 19th century sciences might be relevant to their enterprise This book seeks to fill this gap by exploring how Whitehead's process ontology might provide a new philosophical foundation for the biosciences of the 21st century The central premise shared by all of the volume's authors is the idea that all living processes are irreducible processes Each chapter focuses on assumptions implicit in some of the core concepts of biology such as organism evolution information and teleology that play crucial explanatory roles in the biosciences but as metaphysical concepts fall outside its purview The authors each identify important shortcomings implicit in contemporary biological paradigms and show how an approach grounded in a process oriented metaphysics can avoid them **Comptes Rendus Philosophiques**, 2009 **Zygon**, 2008

Meyer, 2013-06-18 When Charles Darwin finished **The Origin of Species** he thought that he had explained every clue but one Though his theory could explain many facts Darwin knew that there was a significant event in the history of life that his theory did not explain During this event the Cambrian explosion many animals suddenly appeared in the fossil record without apparent ancestors in earlier layers of rock In Darwin's **Doubt** Stephen C Meyer tells the story of the mystery surrounding this explosion of animal life a mystery that has intensified not only because the expected ancestors of these animals have not been found but because scientists have learned more about what it takes to construct an animal During the last half century biologists have come to appreciate the central

importance of biological information stored in DNA and elsewhere in cells to building animal forms Expanding on the compelling case he presented in his last book Signature in the Cell Meyer argues that the origin of this information as well as other mysterious features of the Cambrian event are best explained by intelligent design rather than purely undirected evolutionary processes **Darwin's Pious Idea** Conor Cunningham,2010-12-03 According to British scholar Conor Cunningham the debate today between religion and evolution has been hijacked by extremists on one side stand fundamentalist believers who reject evolution outright on the opposing side are fundamentalist atheists who claim that Darwin s theory rules out the possibility of God Both sides are dead wrong argues Cunningham who is at once a Christian and a firm believer in the theory of evolution In Darwin s Pious Idea Cunningham puts forth a trenchant compelling case for both creation and evolution drawing skillfully on an array of philosophical theological historical and scientific sources to buttress his arguments **New Scientist** ,2009 **Outlook** Alfred Emanuel Smith,Francis Walton,1889 **The Christian Union** ,1886 **A Short History of Philosophy** Archibald Browning Drysdale Alexander,1908 **Encyclopaedia Britannica** ,1929 **The Encyclopædia Britannica** James Louis Garvin,Franklin Henry Hooper,Warren Earle Cox,1929 **Scientific American** ,1905 **The Modern Review** Ramananda Chatterjee,1925 Includes section Reviews and notices of books
