A Naturalist And Other Beasts Tales From A Life In The Field:

A Naturalist and Other Beasts George B. Schaller, 2010-05-04 Since the 1950s eminent field biologist George Schaller has roamed through many lands observing wild animals and conducting landmark long term studies that have deepened our understanding of these creatures He has reported and reflected on his work in classic much acclaimed books including *The Last Panda* and National Book Award winner *The Serengeti Lion* but much of his best writing has been ephemeral published in magazines only to drop out of sight This collection features 19 short pieces brought together in book form to offer a unique overview of his life in the field Chapters describe stalking tigers in India and jaguars in Brazil's Pantanal swamps studying mountain gorillas in Central Africa and predator prey relations in the Serengeti tracking newfound species on the wild border of Vietnam and Laos searching for snow leopards in the Hindu Kush and Schaller's groundbreaking work with giant pandas in Sichuan Later accounts broaden the focus from individual creatures to whole ecosystems The careless rapture of my early studies has been replaced more and more by efforts to protect animals and their habitats he writes New to this book are Schaller's introductions for each chapter which add and update information and an overall introduction that looks back on his remarkable career

From the Mist: A Life Restored by Nature Patrick Walter Herzog, 2017-09 For years the trail of his life led through dense marshes high mountain forests and steamy jungles Then it stopped with just one word Cancer For the next seven years Pat Herzog was pursued by chronic leukemia until undergoing life threatening experimental treatment Thereafter he was relentlessly bushwhacked by fatigue and brain fog skirting the edges of depression Only by regaining his passion for nature was he finally able to overcome his fear of living More than an authentic tale of illness *From the Mist: A Life Restored By Nature* is a story of hardiness faith and renewal And it is tangible proof of the undeniable healing powers of nature

Heart of the Jaguar James Campbell, 2025-11-04 A fascinating story of the movement to protect the jaguar and the man who devoted his life to saving the species Once indigenous to North America the jaguar is one of the wildest creatures left on the planet a resilient and efficient predator with a natural habitat that extends throughout Mexico and Central and South America But today one million years after it appeared in the New World the jaguar is struggling to survive It has disappeared entirely from Uruguay and El Salvador and is critically endangered across much of its range *Heart of the Jaguar* tells the story of the extraordinary undertaking to save the jaguar as well as the impassioned conservationist who dedicated his life to the species James Campbell tracks the legacy of Alan Rabinowitz a complex personality and a formidable scientist whom *Time* magazine called the Indiana Jones of wildlife protection Rabinowitz first studied jaguars in the jungles of Belize and the Brazilian Pantanal in the 1980s and later led the charge for the Jaguar Corridor Initiative making it his dying mission to protect the big cat's historic habitat Campbell journeys across two continents in search of the species past present and future taking readers from the Bering Land Bridge to pre Columbian jungle temples and modern day jaguar preserves Despite the thriving trade in jaguar parts and the ravages of industrial agriculture and climate change Campbell finds

sources of hope wildlife biologists Indigenous organizers ranchers and park administrators who carry on Rabinowitz s legacy
