A Philosophical History Of Rights:

A Philosophical History of Rights Gary B. Herbert, *Human Rights in World History* Peter N. Stearns, 2012 The book goes on to describe the rise of the first modern style human rights statements associated with the Enlightenment and contemporary antislavery and revolutionary fervour History and Educational Philosophy for Social Justice and Human Rights Chowdhury, Jahid Siraz, Vadevelu, Kumarashwaran, Zakaria, A.F.M., Al-Mamun, Abdullah, Ahmed, Sajib, 2024-03-22 In the complex landscape of educational philosophy and policy a difficult challenge arises the entwined issues of racism and other demographic differences and evolving education policies Traditional historical accounts fall short of addressing the broader historical patterns that underscore these challenges particularly their colonial legacy The need for a fresh perspective becomes evident one that transcends chronology and delves into the intricate dynamics shaping contemporary educational thought *History and Educational Philosophy for Social Justice and Human Rights* emerges as a groundbreaking solution to this conundrum Through a broad developmental and historical lens the book provides a fresh perspective on the role of differences as the core content and subject of education It advocates for cultural resistance and a permanent political struggle by political cultural minorities and social movements while also challenging public institutions especially schools to actively embrace and utilize differences in their foundational work By engaging with the tensions and struggles around differences the book contends that institutions can transform becoming agents of positive change and contributing to the foundation of an inclusive and participatory democracy This book invites scholars and educators to not only understand the challenges but to actively participate in shaping a future where differences are not merely acknowledged but celebrated within the realms of education and society at large

Moral Issues in Military Decision Making Anthony E. Hartle, 2004 Much has changed in warfare in recent years with America now dominant on the international scene and terrorism the new enemy In light of these changes the need for moral grounding in military actions is a more pressing concern than ever When it was originally published *Moral Issues in Military Decision Making* reflected the concerns posed by nuclear stalemate and the lessons of Vietnam In that highly praised work Anthony Hartle outlined the essential elements of the Professional Military Ethic created for American military forces In this new edition he reexamines the moral foundations for America's military leadership in the post 9/11 era Considering world affairs since the first edition the Gulf War, Bosnia, Afghanistan, Iraq, 9/11 and the emergence of the United States as an unrivaled military power Hartle explains how these events have raised ethical issues that differ dramatically from those of the Cold War by the war on terrorism, homeland defense, asymmetric warfare, the proliferation of American military interventions and the UN's role in peacekeeping operations Using meticulously analyzed case studies twice as many as in the first edition he considers such moral dilemmas as torture, challenging superior officers' use of overwhelming force and responding to fire in the presence of civilian shields In this revision Hartle examines further the status of professional military ethics in light of current affairs changes in the articulation of military values and recent

research In a new chapter on human rights he relates moral principles directly to values embedded in the Constitution and argues that overwhelming American military power cannot succeed unless it is accompanied by the moral force of the values it seeks to protect difficulties of applying conventional laws of war and human rights doctrine in military operations Hartle convincingly shows that national security is as much about the preservation of moral principles as it is about the protection of America's citizens and borders His book demonstrates that the American military must continue to observe those principles in order to be effective in its primary mission **Human Rights** Michael Goodhart, 2013 Human Rights Politics and Practice is an introduction to human rights that goes beyond a purely legal perspective to look at theoretical issues and practical approaches Bringing together leading experts it is up to date with cutting edge research in a constantly evolving field

Great Debates in American History: State rights (1798-1861); Slavery (1858-1861) ; with an introduction by E.

D. Warfield Marion Mills Miller, 1913 **Great Debates in American History: State rights (1798-1861); slavery (1858-1861)** Marion Mills Miller, 1913 **Citizenship and Human Rights** Christian H Kälin, 2024-02-08 Can universal human rights and different national citizenship regimes ever be compatible This book argues that they can't setting out a legal philosophical critique of the tension between both It explores whether the emergence of postnational models of citizenship that aim at decoupling human rights and citizenship succeed in overcoming tensions between the universal multiculturalism universal human rights postnational values and the particular citizenship borders national values and diverse local narratives As a result of this exploration the author argues that it is illegitimate to speak of universal human rights universal human dignity or universal social justice It is only by recognising this reality that a much needed transformation of human rights and citizenship can be undertaken in a meaningful way This provocative and compelling work will appeal to both human rights and citizenship lawyers as well as others involved in human rights law at NGOs governments international organisations and indeed anyone with an interest in the subject of how human rights evolved and new concepts for the future **The Rights Retained by the People: The history and meaning of the Ninth Amendment** Randy E. Barnett, 1989 **A History of the National Woman's Rights Movement for Twenty Years**, 1871 This pamphlet includes speeches by Matilda Joselyn Gage and Elizabeth Cady Stanton and an appendix including information on actions taken since the convention including the memorial of Victoria Woodhull to Congress 19 December 1870 and her Great Secession speech before the NAWSA at Apollo Hall May 11 1871

Horizontal Rights Gautam Bhatia, 2023-08-24 This book provides a new conceptual model for considering constitutional rights from a comparative perspective A prestigious club bars women from standing for executive positions A homeowner refuses to rent their house to a person on grounds of their race Each of these real life cases involves the exercise of private power which deprives individuals of their rights Can these individuals invoke the Constitution in response Horizontal Rights An Institutional Approach brings a fresh perspective to these age old yet fraught issues This book argues that constitutional scholarship and doctrine across

jurisdictions has proceeded from an inarticulate premise called default verticality. This is based on a set of underlying philosophical assumptions which presumes that constitutional rights are presumptively applicable against the State and need special justification to be applied against private parties. Departing from default verticality and its assumptions this book argues that constitutional rights should apply horizontally between private parties where the existence of an economic social or cultural institution creates a difference in power between the parties and allows one to violate the rights of the other. The institutional approach aims to be both theoretically convincing as well as providing a workable model for constitutional adjudication. It applies both to classic issues such as restrictive covenants as well as cutting edge contemporary legal problems around the regulation of platform work and the distribution of property upon divorce. This promises to be an exciting new contribution to the global conversation around constitutional rights and private power.

History of the

League for Industrial Rights Walter Gordon Merritt, 1925 **Human Rights and Moral Reasoning** Michael Shortall, 2009 This study is a response to the observation of the critical importance of human rights in the ethical discourse of the public sphere. Yet despite the broad consensus there exists a plurality of approaches to their exposition and justification each bound to a particular way of moral theology requires that such models be taken seriously. To this end it presents a comparative investigation of three theorists each representative of a different tradition of enquiry.

The Politics of Human Rights Andrew Vincent, 2010 The Politics of Human Rights provides a systematic introductory overview of the nature and development of human rights. At the same time it offers an engaging argument about human rights and their relationship with politics. The author argues that human rights have only a slight relation to natural rights and they are historically novel. In large part they are a post 1945 reaction to genocide which is in turn linked directly to the lethal potentialities of the nation state. He suggests that an understanding of human rights should nonetheless focus primarily on politics and that there are no universally agreed moral or religious standards to uphold them. They exist rather in the context of social recognition within a political association. A consequence of this is that the 1948 Universal Declaration is a political not a legal or moral document. Vincent goes on to show that human rights are essentially reliant upon the self limitation capacity of the civil state. With the development of this state certain standards of civil behavior have become for a sector of humanity slowly and painfully more customary. He shows that these standards of civility have extended to a broader society of states. At their best human rights are an ideal civil state vocabulary. The author explains that we comprehend both our own humanity and human rights through our recognition relations with other humans principally via citizenship of a civil state. Vincent concludes that the paradox of human rights is that they are upheld to a degree by the civil state but the point of such rights is to protect against another dimension of this same tradition the nation state. Human rights are essentially part of a struggle at the core of the state tradition.
