Strauss,2015-10-23 Efforts to teach students pursuing graduate degrees in urban and regional planning are often frustrated by the case books that have been prepared for use by law professors teaching similar courses Dawn Jourdan and Eric J Strauss have attempted to take their concerns to heart in the design of this Planning for Wicked Problems A Planner's Guide to Land Use Law Each chapter begins with a planning problem that is complex and has no correct answer Students should answer this hypothetical before reading the subsequent

The third section of each chapter includes a series of edited court opinions. The cases selected have been identified by American Institute of Certified Planners as those fundamental to planning education. **Regulating Paradise** David L. Callies, 2010-07-06 Land use in Hawai'i remains the most regulated of all the fifty states. According to many sources the process of going from raw land to the completion of a project may well average ten years given that ninety five percent of raw land is initially classified by the State Land Use Commission as either conservation or agriculture. How did this happen and to what end. Will it continue. What laws and regulations control the use of land. Is the use of land in Hawai'i a right or a privilege. These questions and others are addressed in this long overdue second edition of *Regulating Paradise* a comprehensive and accessible text that will guide readers through the many layers of laws plans and regulations that often determine how land is used in Hawai'i. It provides the tools to analyze an enormously complex process one that frustrates public and private sectors alike and will serve as an essential reference for students planners regulators lawyers land use professionals environmental and cultural organizations and others involved with land use and planning.

**Legal Foundations of Land Use Planning** Jerome G. Rose, 2012-12-01 Urban planning is a community process the purpose of which is to develop and implement a plan for achieving community goals and objectives. In this process planners employ a variety of disciplines including law. However the law is only an instrument of urban planning and cannot solve all urban problems or meet all social needs. The ability of the legal system to implement the planning process is limited by philosophical historical and constitutional constraints. Jurisprudence is concerned with societal values and relationships that limit the effectiveness of the law as an instrument of urban planning. When law is definite and certain freedom is enhanced within the boundaries created

by the law This doctrine of Anglo American law imposes an obligation on courts to be guided by prior judicial decision or precedents and when deciding similar matters to follow the previously established rule unless the case is distinguishable due to facts or changed social political or economic conditions The author focuses on seven specific areas of law in relation to land use planning law as an instrument of planning zoning exclusionary zoning and managed growth subdivision regulations site plan review and planned unit development eminent domain and the transfer of development rights Jerome G Rose cites more than one hundred court cases and the indexed list serves as a useful encyclopedia of land use law This is a valuable sourcebook for all legal experts urban planners and government officials

**Disability** Robin Paul Malloy,2014-10-27 In Land Use Law and Disability Robin Paul Malloy argues that our communities need better planning to be safely and easily navigated by people with mobility impairment and to facilitate intergenerational aging in place To achieve this communities will need to think of mobility impairment and inclusive design as land use and planning issues in addition to understanding them as matters of civil and constitutional rights Although much has been written about the rights of people with disabilities little has been said about the interplay between disability and land use regulation This book undertakes to explain mobility impairment as one type of disability in terms of planning and zoning The goal is to advance our understanding of disability in terms of planning and zoning to facilitate cooperative engagement between disability rights advocates and land use professionals This in turn should lead to improved community planning for accessibility and aging in place
