Manual Repair Echo 2015:

Textbook of Echocardiography V Amuthan, Satish K Parashar, 2022-02-27 An echocardiogram uses sound waves to produce images of the heart. This common test allows a doctor to see the heart beating and pumping blood and subsequently identify heart disease. This book is a complete guide to performing and interpreting an echocardiogram. 56 chapters describe both basic and advanced techniques for diagnosing different heart disorders. The second edition has been fully revised to provide clinicians with the latest developments and techniques in the field. Seven new chapters have been added to this edition covering echocardiography and artificial intelligence, hypertension, arrhythmogenic right ventricular dysplasia, Kawasaki disease, cardio oncology, diabetes mellitus and foetal echo. Dedicated chapters emphasise the role of echo in surgical procedures and explore its use with electrophysiology in patients with pacemakers and those undergoing cardiac resynchronisation therapy. The book is highly illustrated with many 2D and 3D echo images helping explain the descriptive text for each topic. The previous edition 9789352700929 published in 2017

Practice of Clinical Echocardiography

Comprehensive Insights into Mitral Valve Prolapse: From biology to future perspectives of treatment, passing through diagnostic tools, surgical techniques and transcatheter options

Christophe Tribouilloy, Marco Zanobini, Claudia Maria Loardi, 2023-09-11

Mitral valve prolapse MVP consisting of an abnormal protrusion of mitral leaflets into the left atrium is the main cause of severe mitral regurgitation and it often requires surgical or interventional correction. It mainly represents a typical adult disease with an average prevalence in industrialized countries ranging from 2 to 8% but even the pediatric population may be affected showing specific features concerning both anatomy and treatment. Although its existence and clinical characteristics are known for several decades every aspect of this pathological condition is in continuous evolution being the subject of biologists, cardiologists and surgeons active research. The aim of the present Research Topic is to address the MVP entity in its completeness trying to describe all actual knowledge concerning molecular mechanisms, different clinical presentations, fibroelastic degeneration in elderly people or Barlow disease in young patients, diagnostic findings and tools mainly represented by echocardiography and Nuclear Magnetic Resonance, their specific application to newly developed transcatheter and minimally invasive treatments, indications, surgical management and interventional strategies. For all these big chapters special attention will be addressed to show temporal knowledge evolution and new elements acquisition since the central message is that MVP is in flux and far from full comprehension.
