Bioinformatics Converting Data To Knowledge Workshop Summary:

Bioinformatics National Research Council, Robert Pool, Division on Earth and Life Studies, Joan Esnayra, Commission on Life Sciences, Board on Biology, 2000-11 The goal of this workshop was to bring together bioinformatics stake holders from government, academe and industry for a day of presentations and dialogue. Fifteen experts identified and discussed some of the most important issues raised by the current flood of biologic data. Topics explored included the importance of database curation, database integration and interoperability, consistency and standards in terminology, error prevention and correction, data provenance, ontology, the importance of maintaining privacy, data mining and the need for more computer scientists with specialty training in bioinformatics. Although formal conclusions and recommendations will not come from this particular workshop, many insights may be gleaned about the future of this field from the context of the discussions and presentations described here.
