**Balancing Cultural and Corporate Identity Aspects in Standardising and/or Localising Websites** Constantin Meissner, 2006-01-27 Inhaltsangabe Abstract The worldwide economy is currently in a state of upheaval For decades the traditional marketplace was the common way to buy goods services and to do business People set up shops and met in conference rooms to negotiate big business deals However since the middle of the 90's the business world has been undergoing a tremendous change While the basic rules for doing business have not altered conditions and terms have changed significantly The emergence of the Internet was the main catalyst for this drastic change in the business world At first the Internet was considered to be merely another medium with which people had to deal with It was regarded as a concomitant which did not necessarily have to be used in companies But the possibilities the Internet offered were and are tremendous Both private people and companies discovered the opportunities harboured by the Internet Firms quickly realised that the Internet can and must be a medium which was worth taking a closer look at The same applied for individuals However the very purpose of its work which is communication between private people over the Internet can be overlooked and neglected in this context The first part of the present thesis focuses on the Internet and how companies and individuals use the digital environment to do business The objective of firms is mainly to do business either with other firms or with private people The Internet is considered to be a medium and an interface both parties have to use With the help of the Internet companies are expected to increase their efficiency and reduce transaction costs The unique characteristics of

the Internet such as its omnipresence promise both parties an increase in their business activities Furthermore the Internet has to be perceived as a great parallel world to the traditional existing one Of course companies can exclusively exist and compete on the Internet But what they must not neglect is the fact that individuals are people that communicate interact and perform everywhere on the Internet The human aspect is still one of the central factors when looking at the relatively new phenomenon of the Internet Nevertheless this human factor has somehow been neglected by web designers and marketers for several years Companies set up web pages filled them with content and thought that someone might hopefully visit the page and buy a product online Every visitor to a website *Cost Reduction and Control Best Practices* Institute of Management and Administration (IOMA),2013-08-12 Cost Reduction and Control Best Practices provides financial managers with no nonsense balanced and practical strategies that are being targeted and used nationwide for controlling costs by thousands of companies in areas such as human resources compensation benefits purchasing outsourcing use of consultants taxes and exports These best practices are based on the trenches experience research proprietary databases and consultants from the Institute of Management and Administration IOMA and other leading experts in their fields Provides best practices and techniques for controlling costs within a company New chapters focus on outsourcing costs downsizing consultants costs and business tax costs Provides the latest strategies companies re using to control costs
