Optimization and Fairness Wieslaw Kubiak, 2008-11-16 Proportional Optimization and Fairness is a long needed attempt to reconcile optimization with apportionment in just in time JIT sequences and find the common ground in solving problems ranging from sequencing mixed model just in time assembly lines through just in time batch production balancing workloads in event graphs to bandwidth allocation internet gateways and resource allocation in computer operating systems The book argues that apportionment theory and optimization based on deviation functions provide natural benchmarks for a process and then looks at the recent research and developments in the field Individual chapters look at the theory of apportionment and just in time sequences minimization of just in time sequence deviation optimality of cyclic sequences and the oneness bottleneck minimization competition free instances Fraenkel's Conjecture and optimal admission sequences response time variability applications to the Liu Layland Problem and pinwheel scheduling temporal capacity constraints and supply chain balancing fair queuing and stride scheduling and smoothing and batching *Transformational Change for People and the Planet* Juha I. Uitto, Geeta Batra, 2022-01-13 This Open Access book deals with the pressing question of how to achieve transformational change that reconciles development with environmental sustainability It particularly focuses on the role of evaluation in finding sustainable solutions Environment and development are closely interlinked as are human health and ecosystem health The pandemic that began in 2020 demonstrated in no uncertain terms how destruction of habitats has allowed hitherto unknown pathogens spill over to humans wreaking havoc on people's lives and livelihoods We are already seeing the impacts of global climate change in terms of heatwaves forest fires and increased storms The Sustainable Development Goals SDGs explicitly recognize the equal importance of the social economic and environmental dimensions of development In these turbulent times when humankind faces multiple complex challenges it is essential to know that our responses are effective and that they make a positive difference Evaluation can provide invaluable lessons to how we design policies strategies and programs and how we allocate limited resources between competing priorities This book brings together key thinkers and practitioners from the public and private sectors from major multilateral organizations and from bilateral donor agencies to present the latest knowledge and experience on how to evaluate interventions in the nexus of environment and development The book does not promote any particular approach or methodology but rather emphasizes the need for mixed methods to address the question at hand in the best and most suitable manner It covers cases from a variety of fields from climate change mitigation and adaptation energy efficiency and renewable energy natural resources

management biodiversity conservation and more This book is not a conference proceedings although it has its roots in the Third International Conference on Evaluating Environment and Development organized by the GEF Independent Evaluation Office in October 2019 The conference brought together a larger number of established and upcoming evaluators researchers and evaluation users from the Global North and South representing a wide variety of organizations to discuss the frontiers of environment and development evaluation Following the conference the editors identified and contacted the participants who made key contributions at the conference and asked them to develop their ideas and papers into book chapters according to a coherent plan
