The Struggle for the Long-Term in Transnational Science and Politics Jenny Andersson, Eglė Rindzevičiūtė, 2015-04-10

This book reconsiders the power of the idea of the future Bringing together perspectives from cultural history environmental history political history and the history of science it investigates how the future became a specific field of action in liberal democratic state socialist and post colonial regimes after the Second World War It highlights the emergence of new forms of predictive scientific expertise in this period and shows how such forms of expertise interacted with political systems of the Cold War world order as the future became the prism for dealing with post industrialisation technoscientific progress changing social values Cold War tensions and an emerging Third World A forgotten problem of cultural history the future re emerges in this volume as a fundamentally contested field in which forms of control and central forms of resistance met as different actors set out to colonise and control and others to liberate The individual studies of this book show how the West European African Romanian and Czechoslovak long term was constructed through forms of expertise computer simulations and models and they reveal how such constructions both opened up new realities but also imposed limits on possible futures
