Finite Mathematics, from Sets to Game Theory Adelbert F. Hackert, 1974 *Algebra for Athletes* Cameron Bauer, 2007 Capitalises on the wealth of mathematical knowledge students already possess because of their familiarity with the scorekeeping and motion in sports In this way the book takes advanced concepts such as exponents vector multiplication and the unit circle to relate them to students everyday lives While the book is meant to appeal to

students who might not otherwise choose to study algebra it employs highly challenging material much of which is not taught until engineering school Thus the book also provides a window to the professional world Applications in accounting aeronautical engineering civil engineering and other fields are presented along with the sports examples Elementary Contemporary Mathematics Merlin Maurice Ohmer, Clayton V. Aucoin, Marion J. Cortez, 1972 **Everyday Mathematics**, 2004 Contains comprehensive background information about mathematical content and program management This manual familiarizes teachers with the program s features routines and provides ideas for organizing and implementing the curriculum **Algebra 1** Collins Publishers Staff, William Collins, Gilbert J. Cuevas, Russell J. Foster, Gordon Staff, Moore-Harris, Rath, William L. Swart, Winters, 1998 **Conceptual Understanding of Multiplicative Properties Through Endogenous Digital Game Play** Andre Denham, 2012 This study purposed to determine the effect of an endogenously designed instructional game on conceptual understanding of the associative and distributive properties of multiplication Additional this study sought to investigate if performance on measures of conceptual understanding taken prior to and after game play could serve as predictors of game performance Three versions of an instructional game Shipping Express were designed for the purposes of this study The endogenous version of Shipping Express integrated the associative and distributive properties of multiplication within the mechanics while the exogenous version had the instructional content separate from game play A total of 111 fourth and fifth graders were randomly assigned to one of three conditions endogenous exogenous and control and completed pre and posttest measures of conceptual understanding of the associative and distributive properties of multiplication along with a questionnaire The results revealed several significant results 1 there was a significant difference between participants change in scores on the measure of conceptual understanding of the associative property of multiplication based on the version of Shipping Express they played Participants who played the endogenous version of Shipping Express had on average higher gains in scores on the measure of conceptual understanding of the associative property of multiplication than those who played the other versions of Shipping Express 2 performance on the measures of conceptual understanding of the distributive property collected prior to game play were related to performance within the endogenous game environment and 3 participants who played the control version of Shipping Express were on average more likely to have a negative attitude towards continuing game play on their own compared to the other versions of the game No significant differences were found in regards to changes in scores on the measure of conceptual understanding of the distributive property based on the version of Shipping Express played post hoc pairwise comparisons and changes on scores on question types within the conceptual understanding of the associative and distributive property of multiplication measures The findings from this study provide some support for a move towards the design and development of endogenous instructional games Additional implications for the learning through digital game play and future research directions are discussed Algebra 1, 2003 *McDougal Littell Pre-Algebra*, 2004-01-27 *Algebra 1*
