## **Labyrinths Of Power Political Recruitment In Twentieth Century Mexico:**

*Labyrinths of Power* Peter H. Smith, 2015-03-08 Peter Smith has written a comprehensive and in depth study of the structure and more important of the transformation of the national political elite in twentieth century Mexico. In doing so he analyzes the long run impact of the Mexican Revolution of 1910 on the composition of the country's ruling elite. Included in his focus are such issues as the social basis of politics, the recruitment process, political career patterns, the amount of periodic turnover and the relationships between the political and economic elites. The author explores these issues through an empirical computer assisted investigation of biographical information on more than 6 000 individuals who held national political office in Mexico at any time between 1900 and 1976. He then employs various comparative and statistical techniques along with a use of archival data, questionnaires and interviews to determine precisely how Mexico's political system actually works. Professor Smith finds that the Revolution of 1910 did not fundamentally alter the class composition of the national elite although it did redistribute power within it. He further observes that the Mexican Revolution did bring about a separation of political and economic elites and that the route to political success is much more varied and less predictable now than before the revolutionary period. Originally published in 1979. The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press. These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions. The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905.

**Intellectuals and the State in Twentieth-Century Mexico** Roderic Ai Camp, 2014-04-15 In developing countries the extent to which intellectuals disengage themselves in state activities has widespread consequences for the social, political and economic development of those societies. Roderic Camp's examination of intellectuals in Mexico is the first study of a Latin American country to detail the structure of intellectual life rather than merely considering intellectual ideas. Camp has used original sources including extensive interviews to provide new data about the evolution of leading Mexican intellectuals and their relationship to politics and politicians since 1920.
