, 2002 **Advances in Sustainable Building Materials, Design and Energy Systems** Sanjay Kumar, Brahim
ElBhiri, 2025-01-23 This book is a great opportunity to make the research community discuss the dangerous environmental
challenges such as climate change and its huge effects in addition to the world's reliance on fossil fuel and non renewable
resources In recent years the authors have been focused on the advancements of technology and how it can improve our lives
but the authors often overlook the fact that it is creating an unsustainable approach that comes at a high cost which makes a
sustainable approach to cities necessary focusing on accessible public transport energy water and food security and
regenerating compact fabric areas To discuss how to reach this sustainable approach IEREK held the Advances in Energy
Research Materials Science and Built Environment EMBE conference from October 3 to 4 2024 with attendees from all over
the world It provides an opportunity to exchange ideas and solutions on urban planning sustainable architecture climate
change mitigation and innovative design The EMBE conference hosts a variety of knowledgeable keynote speakers and
researchers who discussed the integration of technology in sustainable urban planning green urbanism preservation of
coastal areas innovative renewable materials and responsive architecture The book covers a wide range of scientific
knowledge that can lead humanity toward a sustainable and greener future **Military Culture and Popular Patriotism**
in Late Imperial Austria Laurence Cole, 2014-07-03 Military Culture and Popular Patriotism in Late Imperial Austria
examines the interplay between popular patriotism and military culture in late imperial Austria Laurence Cole suggests that

two main questions should be asked regarding the western half of the Habsburg Monarchy during the period from the mid nineteenth century to the outbreak of war in 1914 Firstly how far did imperial Austrian society experience a process of militarization comparable to that of other European countries Secondly how far did the military sphere foster popular patriotism in the multinational state Various manifestations of military culture including hero cults and above all military veterans associations provide the main subject for analysis in this volume After exploring the historical development of military culture in the Habsburg Monarchy Cole explains how the long reign of Emperor Franz Joseph I constituted a decisive phase in the militarization of Austrian society with the dynasty and state emphasizing the military's role as the locus of loyalty Popular manifestations of military culture such as the hero cult surrounding Field Marshal Radetzky and military veterans associations complemented the official agenda in many respects However veterans associations in particular constituted a political mobilization of the lower middle and lower classes who asserted their own interests and position in civil society as is shown by case studies of regions of the Austrian state with significant Italian speaking populations Trentino and the Littoral State attempts to assert greater control of veterans activities led to national and political opposition at a time when tensions over militarism and foreign policy increased Military Culture and Popular Patriotism in Late Imperial Austria thus raises the question of whether the military was really a bulwark of the multinational state or rather a polarizing force in imperial Austrian society
