**Automated Electronic Filter Design** Amal Banerjee, 2017-08-29 This book describes a novel efficient and powerful scheme for designing and evaluating the performance characteristics of any electronic filter designed with predefined specifications The author explains techniques that enable readers to eliminate complicated manual and thus error prone and time consuming steps of traditional design techniques The presentation includes demonstration of efficient automation using

an ANSI C language program which accepts any filter design specification e g Chebyschev low pass filter cut off frequency pass band ripple etc as input and generates as output a SPICE Simulation Program with Integrated Circuit Emphasis format netlist Readers then can use this netlist to run simulations with any version of the popular SPICE simulator increasing accuracy of the final results without violating any of the key principles of the traditional design scheme [Analog Electronic Filters](#) Hercules G.
