**The Art of BMW** Peter Gantriis, 2008-09-15 BMW began its life in aero engineering as anyone who's ever ridden one of its motorcycles might guess. These are bikes as close to airborne as any get. And what's more, fifty percent of all the motorcycles BMW has manufactured are still flying down the world's roads. These are the best, and in this book the best of the best get their due with brilliant full color photographs of BMW's classic models and detailed descriptions of their features, all located within the context of a concise history of this legendary marque. From the first of BMW's bikes, the R32, through the models that catapulted the company out of the ruins of World War II to the latest bikes with the revamped opposed twin cylinder boxer engines that brought BMW its first fame, these are the bikes that made history and better yet gave the most demanding riders a taste for flight.

**Vincent Motorcycles** Philippe Guyony, 2021-10-28 Very few motorcycles have carved a mark in history like the Vincent V twin. From its arrival in 1946 and up to the present day, on the road, in club racing, in drag races, or competing for land speed records, it dominated the motorcycle world, leading to the famous catchphrase coined by the factory: "The World's Fastest Standard Motorcycle." It was a FACT, NOT a slogan. Images such as that of Rollie Free in swimming trunks, laying flat on his back, modified Black Shadow, and taking the American motorcycle land speed record at Bonneville in 1948, have now passed into posterity. In fact, the big Vincent was so ahead of its time that it continued to compete successfully, almost arrogantly, in racing until the mid 1970s, against modern bikes. No other motorcycle in the world can claim this kind of achievement. Following the premature ending of Vincent production, Fritz Egli's 1967 Egli Vincent was the first chassis completely redesigned for a Vincent in 21 years. Egli's machine inspired numerous builders for several generations, and this book traces holistically the story of all those motorcycles in the broad context of the classic and modern history of the Vincent. Understand how the flame of passion still burns brightly today.

**Runways & Racers** Terry O'Neil, 2011 Runways and Racers focuses on sports car races held at military installations throughout America in the early 1950s. It was a marriage of convenience for the Sports Car Club of America and the Strategic Air Command, with both parties gaining advantages from the arrangement. The thorn in the side turned out to be a Congressman whose own aspirations exceeded his standing, but who found himself in a position to be able to influence the outcome of events.

**Northeast American Sports Car Races 1950-1959** Terry O'Neil, 2010 This book focuses on the different aspects that contributed to the development of Northeast American sports car racing during the 1950s. The evolution from amateur drivers racing on public roads in 1950 to both professional and amateur drivers racing at private purpose-built tracks in 1959 demanded huge leaps of faith, trust, and understanding. The transition was neither easy nor uneventful for drivers, clubs, or track owners, and the tragedy, politics, and in
