## **Body Brain Love Therapists Regulation:**

*Body, Brain, Love* Karen Rachels, 2015-12-22 Karen Rachels *Body Brain Love A Therapist's Workbook for Affect Regulation and Somatic Attachment* is a first of its kind contribution to the dynamic and unfolding world of body brain integration. This workbook accessibly integrates three critical areas of therapeutic work brought to us by the Decade of the Brain: 1 brain based attachment theory, 2 the neuroscience of affect regulation, and 3 practical somatic skills to grow clients' brains. Therapists have the opportunity to view their own experiences through the lens of neuroscience, including their own dysregulation, and how their attachment strategies interweave with the attachment strategies of clients. By offering a more experiential and somatic way to absorb the information, learning is easy and immediately applicable for therapists seeking to effect transformation with clients. This book bridges mindfulness and neuroscience based self-help books with the more academic, didactically focused books for therapists. It uses a self-help format but is in fact for therapists. Post-tests, charts with clarifying exercises, specific self-focused exercises, games, case vignettes, and a complete session transcript all facilitate learning in both a cognitive and experiential manner. The author has brought this vital information to therapists in a style that easily teaches practitioners necessary and effective 21st Century skills which enhance compassion and self-compassion and create authentic therapeutic relationships.

**Sex Addiction as Affect Dysregulation** Alexandra Katehakis, 2016-09-20  
Examining the neurobiological underpinnings of sex addiction, Neuroaffective science studying the integrated development of the body, brain, and mind has revealed mechanisms linking psychological and biological factors of mental disorders, including addiction. Indeed, its paradigm-shifting theoretical umbrella demonstrated that substance and behavioral dependencies share identical neurobiological workings, and thus that problematic repetitive behaviors are genuine addictions, a state increasingly understood as a chronic brain disorder. Clinical experience strongly suggests that sex addiction (SA) treatment informed by affective neuroscience, the specialty of Alexandra Katehakis, proves profoundly transformative. Katehakis's relational protocol presented here blends neurobiology with psychology to accomplish full recovery. Her Psychobiological Approach to Sex Addiction Treatment (PASAT) joins therapist and patient through a relationally based psychotherapy, a holistic dyadic dance that calls on the body, brain, and mind of both. Written with clarity and compassion, this book integrates cutting-edge research, case studies, verbatim session records, and patient writings, and art. Katehakis explicates neurophysiological, psychological, and cultural forces priming and maintaining SA, then details how her innovative treatment restores patients' interpersonal, sexual, and spiritual relationality.
