Peräkylä, 2023-09-27 This collection highlights new perspectives on the work of Erving Goffman revisiting his place in contemporary social theory and interactional linguistics research and its impact in surfacing new insights in conversation analysis and our understanding of Goffman's legacy. The volume outlines the theoretical foundations of Goffman's research across linguistics and the social sciences. Bringing together a crossdisciplinary group of scholars the book is organized around these themes with sections on self and identity participation and bodily practices in social interaction. Each chapter comprises three perspectives look back at Goffman's original texts their correlation in contemporary empirical research in conversation analysis and a discussion of conceptual implications in relevant fields such as interactional sociolinguistics, linguistic anthropology, critical sociolinguistics and related disciplines. Taken as a whole the book not only offers a comprehensive critical overview of Goffman's legacy in empirical work in conversation analysis and the social sciences but also the conceptual grounding for new studies to investigate his continuing role in contemporary scholarship. Rethinking Body Language Geoffrey Beattie, 2016-06-03 Challenging all of our old

assumptions about the subject Rethinking Body Language builds on the most recent cutting edge research to offer a new theoretical perspective on this subject that will transform the way we look at other people. In contrast to the traditional view that body language is primarily concerned with the expression of emotions and the negotiation of social relationships author Geoff Beattie argues instead that gestures reflect aspects of our thinking but in a different way to verbal language. Critically the spontaneous hand movements that people make when they talk often communicate a good deal more than they intend. This ground breaking book takes body language analysis to a whole new level. Engagingly written by one of the leading experts in the field it shows how we can detect deception in gesture speech mismatches and how these unconscious movements can give us real insight into people's underlying implicit attitudes
