Boa Constrictor Dr John Patric,2024-06-04 Introduction to Boa Constrictors For centuries reptile enthusiasts have been captivated by the captivating appearance and fascinating behavior of boa constrictors These amazing snakes which are members of the Boidae family and are indigenous to the forests and jungles of Central and South America are well known for their size strength and gentle nature Boa constrictors powerful bodies and formidable length which can reach up to 13 feet or more in certain cases may initially give them an intimidating appearance Nevertheless despite their enormous size boa constrictors are typically calm and can make wonderful pets for those who can give them the right upbringing The distinctive way that boa constrictors hunt and subdue their prey is one of their most amazing characteristics Boa constrictors use constriction as a means of subduing their prey in contrast to venomous snakes that use toxins to render their victims immobile Boa constrictors use their sharp teeth to strike and grab their victim then their muscular bodies encircle the body and squeeze with such force that the victim is suffocated in minutes by the stoppage of blood flow Boa constrictors are prized for not only their skill at hunting but also for their stunning and varied coloring Boa constrictors can exhibit a wide range of patterns and colors from vivid reds and oranges to subdued browns and grays depending on their genetic makeup and geographic location Because of their adaptability boa constrictors have developed a wide range of morphs and color phases in captivity which has made them well liked by both breeders and collectors
