Hippolyte Bayard and the Invention of Photography Karen Hellman, Carolyn Peter, 2024-05-07 The first English language volume about Hippolyte Bayard one of the inventors of photography who helped transform the burgeoning medium into an art form Hippolyte Bayard 1801-1887 is often characterized as an underdog in the early history of photography From the outset his contribution to the invention of the medium was eclipsed by others such as Louis Jacques Mandé Daguerre 1787-1851 and William Henry Fox Talbot 1800-1877 However Bayard had an undeniable role in the birth of photography and its subsequent evolution into a form of art He was a pioneer in artistic style innovator in terms of practice and teacher of the next generation of photographers Alongside an exploration of Bayard's decades long career and lasting impact this volume presents for the first time in print some of the earliest photographs in existence An album containing nearly 200 images 145 of those by or attributed to Bayard is among the Getty Museum's rarest and most treasured photographic holdings Few prints have ever been seen in person due to the extreme light sensitivity of Bayard's experimental processes making this an essential reference for scholars and enthusiasts of the very beginning of photography This volume is published to accompany an exhibition on view at the J. Paul Getty Museum at the Getty Center from April 9 to July 7, 2024
