 Chung, 2025-02-06 People living in war zones are exposed to numerous stressors including physical harm psychological  
 trauma loss deprivation bereavement or abuse In recent years there has been growing acceptance that war related stressors  
 have the potential to pose a risk to health Epidemiological studies also reveal the health consequences associated with war  
 and trauma and agree that post traumatic stress disorder and depression are common in war affected populations Since the  
 turn of the last century there have also been changes in the conception of war Nowadays wars have evolved into a new form  
 that can affect larger masses instead of hand to hand combat with cannons and rifles War is an artificial disaster and differs  
 from the kind of natural pandemic disaster that affects the whole world Countless deaths forced abandonment of homes  
 families friends and property and severe anxiety about war are experienced because of the war related conditions for millions  
 of humans      **Motor Cycling and Motoring** , 1969-03      Positive or Negative? The Effect of Emerging Technologies and  
 Products on Mental Health Chao Guo, Stuart Gilmour, Peige Song, Aiping Fang, 2023-11-02 Emerging technologies and  
 products such as digital health technology computing platforms wearable devices smartphone sensors and electronic gadgets  
 have the potential to transform and empower society while simultaneously presenting unprecedented challenges in our life  
 Some like electronic cigarettes e cigarettes are for entertainment some like online conference platforms are for convenience  
 and some like social media have become a life necessity However there is an ongoing debate about whether the use of  
 physical and virtual digital technology products can do harm to mental health Some evidence based research shows that  
 frequent use of social media may cause depression and anxiety and derived behavioral phenomena like cyberbullying and  
 game addiction which negatively affect people s lives Other scholars think digital technology products could provide insights  
 into timely personalized engaging and accessible intervention promotion and improvement of mental health Given the  
 ubiquity of digital devices and their complex and subtle associations with mental health more research is needed to bring  
 benefits to both research and daily life practices      Mini Coope Bentley Publishers, 2009 Diagnostic tools and techniques
