World Regional Geography George White,Joseph Dymond,Elizabeth Chacko,Michael Bradshaw,2010-03-29 This shorter  
version of the highly successful Contemporary World Regional Geography 3e gives readers a fresh new approach that  
combines fundamental geographical elements internal regional diversity and contemporary issues This approach allows  
serious discussion of cultural and environmental issues as well as political and economic issues The main innovation in this  
completely rewritten text is in the ordering of the material covered While other texts cut photos illustrations and boxed  
material from their WRG books this essentials version is a completely rewritten text by the authors of Contemporary World  
Regional Geography 3e Each of the nine regional chapters opens with a one or two page map of the region short accounts of  
people or events to provide a personal flavor of the region an outline of the chapter contents and a short section placing the  
region in its wider global context Each regional chapter is consistently organized by three sections The first section  
summarizes the distinctive physical and human geographies of the region the second section explores the internal diversity  
of the region at subregional selected country and local levels The third section focuses on a selection of contemporary issues  
that are important to the people of each region and frequently have implications for the rest of the world Each regional  
chapter follows the same framework allowing students to easily make comparisons from one world region to the next  
Students are encouraged to consider what it means to be part of a global community and to develop their geographical  
understandings of world events The authors have created a text that is readable with a consistent structure within chapters  
containing superior maps and illustrations and finally to offer a concise and more affordable text      **Essentials of World**
