Mass Spectroscopy for Phytochemical Analysis Sreeraj Gopi, Augustine Amalraj, Shintu Jude, 2021-09-30 This new volume provides a bird's eye view of the properties, utilization and importance of high resolution mass spectrometry HRMS for phytochemical analysis. The book discusses the new and state of the art technologies related to HRMS in phytochemical analysis for the food industry in a comprehensive manner. Phytochemical characterization of plants is important in the food and nutraceutical industries and is also necessary in the procedures followed for drug development, toxicology determination, forensic studies, origin verification, quality assurance etc. Easy determination of active compounds and isolation as well as purification of the same from natural matrices are required and the possibilities and advantages of HRMS pave the way for improved analysis patterns in phytochemistry. This book is unique in that its sole consideration is on the importance of HRMS in the field of phytochemical analysis. Along with an overview of basic instrumental information, the volume provides a detailed account of data processing and dereplication strategies. Technologies such as bioanalytical techniques and bioassays are considered also to provide support for the functions of the instruments used. In addition, a case study is presented to depict the complete phytochemical characterization of a matrix by HRMS. The book covers processing and computational techniques, dereplication, hyphenation, high resolution bioassays, bioanalytical screening, purification techniques, applications of gas chromatography, high resolution mass spectrometry and more. Key features: Covers the fundamental instrumentation and techniques; Discusses HRMS based phytochemical research details; Focuses strictly on the phytochemical considerations. High Resolution Mass Spectroscopy for Phytochemical Analysis: State of the Art Applications and Techniques will be a valuable reference guide and resource for researchers, faculty and students in related fields as well as those in the phytochemical industries.
