Dwyer,Derek Wilding,2023-08-23 The book arises from an international research project that explores the future of media  
pluralism policies for online news It investigates the latest European policies and techniques for regulatory intervention and  
examines the consequences of innovative news practices asking How will automation of news affect public opinion in the age  
of social media platforms and what are the consequences In Media Pluralism and Online News the authors make the  
argument that there is an urgent need for revitalised thinking for a media policy agenda to deal with the trends to platform  
power and concentrated media power which is an ongoing global risk to public interest journalism In the transition to a  
media landscape increasingly dominated by broadband internet distribution and the dominance of US centric new media  
behemoths Google Facebook Apple Amazon and Netflix the book investigates measures that can be taken to reduce this  
ongoing march of concentration and the attenuation of media voices Securing the public interest in a vibrant and sustainable  
news media sector will require that merger decisions assess whether there is a reduction in diversity calling for a new public  
interest test and a more expansive policy focus than in the past This would include consideration of the sustainability of local  
businesses the encouragement of original and local news content quality of content in terms of the promotion of news
