Active Rules in Database Systems Norman W. Paton, 2012-09-05 A timely survey of the field from the point of view of some of the subject's most active researchers. Divided into several parts organized by theme the book first covers the underlying methodology regarding active rules followed by formal specification rule analysis performance analysis and support tools. It then moves on to the implementation of active rules in a number of commercial systems before concluding with applications and future directions for research. All researchers in databases will find this a valuable overview of the topic.

Rules and Rule Markup Languages for the Semantic Web Asaf Adi, Suzette Stoutenburg, Said Tabet, 2005-10-24 RuleML 2005 was the first international conference on rules and rule markup languages for the Semantic Web held in conjunction with the International Semantic Web Conference ISWC at Galway Ireland. With the success of the RuleML workshop series came the need for extended research and applications topics organized in a conference format. RuleML 2005 also accommodated the first Workshop on OWL Experiences and Directions. Rules are widely recognized to be a major part of the frontier of the Semantic Web and critical to the early adoption and applications of knowledge based techniques in business especially enterprise integration and B2B e-commerce. This includes knowledge representation KR theory and algorithms markup languages based on such KR engines translators and other tools relationships to standardization efforts and not least applications. Interest and activity in the area of rules for the Semantic Web has grown rapidly over the last five years. The RuleML 2005 Conference was aimed to be this year's premiere scientific conference on the topic. It continued in topic leadership and collaboration with the previous series of three highly successful annual international workshops RuleML 2004, RuleML 2003 and RuleML 2002. The theme for RuleML 2005 was rule languages for reactive and proactive rules complex event processing and event driven rules to support the emergence of Semantic Web applications. Special highlights of the RuleML 2005 conference included the keynote address by Sir Tim Berners Lee Director of W3C.

**Systems** ,2002    **American Book Publishing Record Cumulative 1998** R R Bowker Publishing,1999-03    Rules in Database Systems Norman W. Paton,M.Howard Williams,2012-12-06 This book is the proceedings of a workshop held at Heriot Watt University in Edinburgh in August 1993 The central theme of the workshop was rules in database systems and the papers presented covered a range of different aspects of database rule systems These aspects are reflected in the sessions of the workshop which are the same as the sections in this proceedings Active Databases Architectures Incorporating Temporal Rules Rules and Transactions Analysis and Debugging of Active Rules Integrating Graphs Objects with Deduction Integrating Deductive and Active Rules Integrity Constraints Deductive Databases The incorporation of rules into database systems is an important area of research as it is a major component in the integration of behavioural information with the structural data with which commercial databases have traditionally been associated This integration of the behavioural aspects of an application with the data to which it applies in database systems leads to more straightforward application development and more efficient processing of data Many novel applications seem to need database systems in which structural and behavioural information are fully integrated Rules are only one means of expressing behavioural information but it is clear that different types of rule can be used to capture directly different properties of an application which are cumbersome to support using conventional database architectures In recent years there has been a surge of research activity focusing upon active database systems and this volume opens with a collection of papers devoted specifically to this topic    **Embedded Software** ,2003    Rules in Database Systems Timos Sellis,1995-09-11 This book constitutes the refereed proceedings of the Second International Workshop on Rules in Database Systems RIDS 95 held in Athens Greece in September 1995 The book presents 22 revised full papers selected during a very careful reviewing process from a total of 47 submissions In addition there is a detailed invited introduction for a panel discussion on the Active Database Management Systems Manifesto The papers are organized in sections on semantics for database systems active behavior rule base organization and modeling rule analysis deductive databases implementation and benchmarking of active database systems and cooperative systems support    **Proceedings of the Twenty-fourth International Conference on Very Large Databases, New York, NY, USA, 24-27 August, 1998** Ashish Gupta,Oded Shmueli,Jennifer Widom,1998
