**Violent Alternatives to War** Jean-Francois Caron, 2021-09-20 When we take a look back at the way Western states have fought terrorist organizations in the last 20 years it is difficult not to think that these alternatives to war might have been more ethical than the decisions to invade Afghanistan and Iraq in 2001 and in 2003 These cases speak for themselves as they have both led to the death of hundreds of thousands of innocent civilians which is highly paradoxical in light of the logic that supported these interventions There is a need to think of alternatives to war that will imply the legitimization of proactive sets of measures that would allow states to effectively prevent terrorist attacks through the use of kinetic force in a limited extent as a way to avoid the terrible and unpredictable effects of wars Violent Alternatives to War Justifying Actions Against Contemporary Terrorism engages in a moral discussion of the challenges associated with violent alternatives to war when confronting terrorism and suggests a comprehensive approach to how this form of violence can be legitimized and how it ought to be used against this contemporary threat

*Aviation Law: Cases, Laws and Related Sources* Paul B. Larsen, Joseph Sweeney, John Gillick, 2012-06-07 The flying public airlines and governments will all agree on one date that changed commercial flying that was September 11 2001 The first edition of *Aviation Law Cases Laws and Related Sources* described early consequences of that event particularly compensation of victims and early tightening of aviation security Subsequently laws and regulations affecting all aspects of aviation changed so rapidly that it became difficult to set a cut off date for the second edition The rapid flow of events made an update urgent Several gaps in the materials of the first edition became evident as the book was used The authors filled those gaps pruned old materials and added much new material describing not only the later developments but also evolving economics and flight technology The objective of the case book is to offer a basic handbook for air law practitioners providing them with a starting point for almost any subject they may encounter For example a lawyer specializing in liability law will quickly be able to find basic materials on the International Civil Aviation Organization ICAO air carrier licensing FAA certification and labor law The book continues to present aviation law from the American point of view Thus the book will be valuable for foreign air lawyers who are guiding foreign airlines in service to the very important North American pool of air traffic The book also explains the international scene to American air lawyers so that they may guide their clients who provide foreign service New chapters on liability for cargo damage and for ground damages have been added and new materials on the legal rights of lessors successors actual carriers and code shares A chapter on environmental regulation of aviation noise and emissions is also new All the main subjects listed in the first edition are significantly updated The three authors are veteran transportation lawyers and continue their activities in this field

**Alternative War** Debora Godfrey,2021-11 Stories about war Causation, Evidence, and Inference Julian Reiss,2015-05-22 In this book Reiss argues in favor of a tight fit between evidence concept and purpose in our causal investigations in the sciences There is no doubt that the sciences employ a vast array of techniques to address causal questions such as controlled experiments randomized trials statistical and econometric tools causal modeling and thought experiments But how do these different methods relate to each other and to the causal inquiry at hand Reiss argues that there is no gold standard in settling causal issues against which other methods can be measured Rather the various methods of inference tend to be good only relative to certain interpretations of the word cause and each interpretation in turn helps to address some salient purpose prediction explanation or policy analysis but not others The main objective of this book is to explore the metaphysical and methodological consequences of this view in the context of numerous cases studies from the natural and social sciences Hearings Before Committee on Armed Services of the House of Representatives on Sundry Legislation Affecting the Naval and Military Establishment, 1947-[1948] Eightieth Congress, First- [second] Session United States.
