*Watchmakers and Clockmakers of the World* Granville Hugh Baillie, 1951      **Hands of Time** Rebecca

Struthers, 2023-06-13 A hugely entertaining achievement Esquire An engaging survey through a period of intellectual history that reveals as much about people who wear watches as the objects on their wrists Wall Street Journal As impeccably crafted and precisely engineered as any of the watches on which the author has worked so lovingly over the years this book is a joy to behold and a wonder to enjoy Simon Winchester author of *The Perfectionists* and *Land* An award winning watchmaker one of the few practicing the art in the world today chronicles the invention of time through the centuries long story of one of mankind's most profound technological achievements the watch Timepieces have long accompanied us on our travels from the depths of the oceans to the summit of Everest the ice of the arctic to the sands of the deserts outer space to the surface of the moon The watch has sculpted the social and economic development of modern society it is an object that when disassembled can give us new insights both into the motivations of inventors and craftsmen of the past and into the lives of the people who treasured them *Hands of Time* is a journey through watchmaking history from the earliest attempts at time keeping to the breakthrough in engineering that gave us the first watch to today where the timepieces hold cultural and historical significance beyond what its first creators could have imagined Acclaimed watchmaker Rebecca Struthers uses the most important watches throughout history to explore their attendant paradigm shifts in how we think about time indeed how we think about our own humanity From an up close look at the birth of the fakes and forgeries industry which marked the watch as a valuable commodity to the watches that helped us navigate trade expeditions she reveals how these instruments have shaped how we build and then consequently make our way through the world A fusion of art and science history and social commentary this fascinating work told in Struthers's lively voice and illustrated with custom line drawings by her husband and fellow watchmaker Craig is filled with her personal observations as an expert watchmaker one of the few remaining at work in the world today Horology is a vast subject the study of time This compelling history offers a fresh take exploring not only these watches within their time but the role they played in human development and the impact they had on the people who treasured them
