A promising shift from a "No-Safe-Haven" towards a "Global-Enforcer" approach?** Franca Langlet,2023-03-10 Master s Thesis from the year 2019 in the subject Law Penology grade 1 4 Maastricht University language English abstract The purpose of this paper is to evaluate on whether the use of structural investigations in Syria indicate a promising shift in the German practice of the CCAIL from a no safe haven towards a global enforcer approach In order to do so the following steps will be taken First there will be an assessment of the two main legal provisions and their underlying ratio that are relevant for the practice of the CCAIL and their interplay namely 1 CCAIL providing genuine universal jurisdiction to German courts for International Crimes and 153f CCP the prosecutorial discretion given in cases of pure foreign crimes traditionally frustrating 1 CCAIL 36 In a second step cases that are exemplary for the previous approach will be examined on considerations made and reasons

given by the FPG leading to decision to desist from proceeding and the restrictive no safe haven practice followed by an evaluation In a third step the current prosecutorial strategy structural investigations and its theory as well as practice will be analysed to assess how the use of structural investigations changes the evaluation of the reasons underlying the restrictive practice The aim is to answer the research question To what extent structural investigations as the current German prosecutorial strategy used to investigate Crimes of International Law in Syria operate on the interplay between the prosecutorial discretion 153f CCP and the codified universal jurisdiction 1 CCAIL to be applied in a proactive global enforcer manner SIAM Journal on Control and Optimization Society for Industrial and Applied Mathematics,1997 Contains research articles on the mathematics and applications of control theory and on those parts of optimization theory concerned with the dynamics of deterministic or stochastic systems in continuous or discrete time or otherwise dealing with differential equations dynamics infinite dimensional spaces or fundamental issues in variational analysis and geometry Design for Advanced Manufacturing: Technologies, and Processes LaRoux K.
