Channel 4 Maggie Brown, 2021-05-20 This book covers a dramatic decade in the fortunes of Britain's quirkiest broadcaster. It opens in 2009 with the realisation that Channel 4's biggest money spinner *Big Brother* had become a toxic asset and would have to be discarded at the same time as advertising revenues were shrinking in the wake of the 2008 financial crash. Maggie Brown's compelling narrative, which draws on interviews with key players in Channel 4's story and unique access to the broadcaster's archives, takes us inside the boardroom battles, changes in senior management and commissioning teams, interventions by the media regulator Ofcom and the channel's response to a rapidly changing media and political landscape. Brown describes how the channel, under its new chief executive David Abraham, successfully fought off the threat of privatisation, which became a reality after the Conservatives' general election victory in 2015. The price for remaining publicly funded was a substantial relocation of Channel 4's operations, with Leeds announced in 2018 as a new regional hub. The Channel 4 story is also one of ambitious and innovative programming, with a new director of content, Jay Hunt, instigating radical changes in commissioning and scheduling. Brown traces programming hits and losses during this period, with the departure to competitors of celebrity chefs, *Black Mirror*, and Charlie Brooker's horse racing and Formula 1, and a reappraisal of the remit of institutions such as Channel 4 News and Film 4. But there were successes too, with the 2012 Paralympics helping to restore a public service sheen and new programmes such as *Gogglebox* in 2013 connecting with younger audiences, and in 2016 the coup of taking *The Great British Bake Off* from its home at the BBC. *Advanced*

Solutions such as reuse of waste and sustainable waste management must be explored to prevent these adverse effects. *The Handbook of Research on Resource Management for Pollution and Waste Treatment* is a collection of innovative research that examines waste and pollution treatment methods that can be adopted at local and international levels and examines appropriate resource management strategies for environmentally related issues.
