**Applied Qualitative Research Design** Margaret R. Roller, Paul J. Lavrakas, 2015-01-30 This unique text provides a comprehensive framework for creating, managing, and interpreting qualitative research studies that yield valid and useful information. Examples of studies from a wide range of disciplines illustrate the strengths, limitations, and applications of the primary qualitative methods: in-depth interviews, focus group discussions, ethnography, content analysis, and case study, and narrative research. Following a consistent format, chapters show students and researchers how to implement each method within a paradigm neutral and flexible Total Quality Framework (TQF) comprising four interrelated components: Credibility, Analyzability, Transparency, and Usefulness. Unlike other texts that relegate quality issues to one or two chapters, detailed discussions of such crucial topics as construct validity, inter-researcher reliability, researcher bias, and verification strategies are featured throughout. The book also addresses applications of the TQF to the writing, review, and evaluation of qualitative research proposals and manuscripts.

**KEY WORDS** SUBJECT AREAS: case study, content analysis, ethnographic, ethnography, focus groups, interviews, narrative, proposal writing, qualitative research, reliability, research designs, research methods, standards, studies, the literacy, total quality framework, transparency.
