Breastfeeding Biocultural Perspectives:

Breastfeeding Patricia Stuart Macadam, Katherine A. Dettwyler, *Breastfeeding* Patricia Stuart-Macadam, Katherine A. Dettwyler, 2017 Breastfeeding is a biocultural phenomenon not only is it a biological process but it is also a culturally determined behavior As such it has important implications for understanding the past present and future condition of our species In general scholars have emphasized either the biological or the cultural aspects of breastfeeding but not both As biological anthropologists the editors of this volume feel that an evolutionary approach combining both aspects is essential One of the goals of their book is to incorporate data from diverse fields to present a more holistic view of breastfeeding through the inclusion of research from a number of different disciplines including biological and social cultural anthropology nutrition and medicine The resulting book presenting the complexity of the issues surrounding very basic decisions about infant nutrition will fill a void in the existing literature on breastfeeding Provided by publisher Breastfeeding Patricia Stuart-Macadam, Katherine A. Dettwyler, 1995 Breastfeeding is a biocultural phenomenon not only is it a biological process but it is also a culturally determined behavior As such it has important implications for understanding the past present and future condition of our species In general scholars have emphasized either the biological or the cultural aspects of breastfeeding but not both As biological anthropologists the editors of this volume feel that an evolutionary approach combining both aspects is essential One of the goals of their book is to incorporate data from diverse fields to present a more holistic view of breastfeeding through the inclusion of research from a number of different disciplines including biological and social cultural anthropology nutrition and medicine The resulting book presenting the complexity of the issues surrounding very basic decisions about infant nutrition will fill a void in the existing literature on breastfeeding

Evolutionary Perspectives on Infancy Sybil L. Hart, David F. Bjorklund, 2022-01-01 This unique volume is one of the first of its kind to examine infancy through an evolutionary lens identifying infancy as a discrete stage during which particular types of adaptations arose as a consequence of certain environmental pressures Infancy is a crucial time period in psychological development and evolutionary psychologists are increasingly recognizing that natural selection has operated on all stages of development not just adulthood The volume addresses this crucial change in perspective by highlighting research across diverse disciplines including developmental psychology evolutionary developmental psychology anthropology sociology nutrition and primatology Chapters are grouped into four sections Theoretical Underpinnings Brain and Cognitive Development Social Emotional Development Life and Death Evolutionary Perspectives on Infancy sheds new light on our understanding of the human brain and the environments responsible for shaping the brain during early stages of development This book will be of interest to evolutionary psychologists and developmental psychologists biologists and anthropologists as well as scholars more broadly interested in infancy **Encyclopedia of Medical Anthropology** Carol R. Ember, Melvin Ember, 2003-12-31 Medical practitioners and the ordinary citizen are becoming more aware that we need to

understand cultural variation in medical belief and practice The more we know how health and disease are managed in different cultures the more we can recognize what is culture bound in our own medical belief and practice The Encyclopedia of Medical Anthropology is unique because it is the first reference work to describe the cultural practices relevant to health in the world s cultures and to provide an overview of important topics in medical anthropology No other single reference work comes close to matching the depth and breadth of information on the varying cultural background of health and illness around the world More than 100 experts anthropologists and other social scientists have contributed their firsthand experience of medical cultures from around the world *Reproductive Ecology and Human Evolution* Peter Thorpe Ellison,

Negotiated Breastfeeding Caroline Chautems,2021-10-18 Based on an ethnography of postpartum consultations by independent midwives in Switzerland this book produces unique insights into home birth parents breastfeeding journey from the first hours after birth to weaning Considered the natural continuity of childbirth without intervention breastfeeding is a fundamental component of the holistic continuous and individualised care independent midwives provide as they engage with parents in a shared construction of meaning around breastfeeding This book offers new perspectives on the conceptualisation of breastfeeding as a shared process Parents in collaboration with their midwife and baby are jointly constructing negotiated breastfeeding As the child grows and develops questions arise regarding the management of risks the construction of the lactating body and the body work required and the perception of breastfeeding as a means of communication with the child consistent with a child centred approach to parenting Fostering a reflection on the contrasts and similarities between the marginal model of holistic care and the dominant biomedical model this book sheds light on issues of a broader scope the relationship to health risks and health promotion gender inequalities regarding parental roles and responsibilities the concept of the child as a project and the consequential intensification of parenthood The book also explores transversal themes by outlining how reproduction and parenting are undertaken in Switzerland framed by the local cultural political and economic context including the gender system and resulting power relationships Childrearing and Infant Care Issues Pranee Liamputtong,2007 Child rearing practices in every society occur in accordance with the cultural norms of the society In most societies however child rearing practices share a common value the preservation of life and maintenance of the health and well being of a new born infant In this volume the authors bring together salient issues regarding cultural beliefs and practices and social issues regarding infant care and child rearing and infant feeding practices as well as early motherhood in different societies They show that traditional practices surrounding infant care and child rearing continue to live despite the fact that many societies have been modernised Our Babies, Ourselves Meredith Small,1999-05-04 A thought provoking combination of practical parenting information and scientific analysis Our Babies Ourselves is the first book to explore why we raise our children the way we do and to suggest that we reconsider our culture s traditional views on parenting New parents are faced with innumerable decisions to make regarding the best way to care

for their baby and naturally they often turn for guidance to friends and family members who have already raised children But as scientists are discovering much of the trusted advice that has been passed down through generations needs to be carefully reexamined In this ground breaking book anthropologist Meredith Small reveals her remarkable findings in the new science of ethnopediatrics Professor Small joins pediatricians child development researchers and anthropologists across the country who are studying to what extent the way we parent our infants is based on biological needs and to what extent it is based on culture and how sometimes what is culturally dictated may not be what s best for babies Should an infant be encouraged to sleep alone Is breast feeding better than bottle feeding or is that just a myth of the nineties How much time should pass before a mother picks up her crying infant And how important is it really to a baby s development to talk and sing to him or her These are but a few of the important questions Small addresses and the answers not only are surprising but may even change the way we raise our children
