Breeding Anthuriums In Hawaii Breeding Anthuriums In Hawaii:

Breeding Anthuriums in Hawaii Haruyuki Kamemoto, Adelheid R. Kuehnle, 1997-01-01 This book summarizes more than 40 years of research by the book's principal author Haruyuki Kamemoto whose work with breeding systems plant genetics and the development of horticulturally improved varieties of Anthurium has played a fundamental role in the plant's success throughout the world A brief description of the history of Hawaii's Anthurium industry is followed by a discussion of the origin of many of the existing cultivars Secrets of successful plant breeding are disclosed along the way making the book especially valuable to growers and scientific data have been condensed for greater accessibility Sustainable Crop Protection under Protected Cultivation P. Parvatha Reddy, 2016-01-07 This book focuses on pests insect and mite and diseases fungal bacterial viral and nematode in protected horticulture fruits vegetables and ornamentals using physical cultural chemical biological host resistance and integrated methods It opens with chapters describing the setting in which integrated pest and disease control operates i.e. the greenhouse and its environment Subsequent chapters present the basic strategies and tactics of different control methods including integrated control with special reference to greenhouse crops Further chapters include the different facets of biological pest and disease control its scientific bases its development in practice its commercialization and quality control The concluding chapters of the book highlight the present status of integrated pest and disease control for the most important greenhouse crops fruits vegetables and flower crops worldwide The book's final chapter explores future challenges for researchers assigned to identify non pesticide methods and integrate sustainable pest management technologies that can contribute to increased productivity such as breeding for durable resistance biological control and devising integrated methods that will have minimal adverse environmental and social impacts Among productivity enhancing technologies protected cultivation has a tremendous potential to increase the yield of vegetables and flower crops by several fold Pests and diseases are one of the major challenges to protected cultivation Year round warm temperatures and relatively high humidity together with abundant food make the protected environment of greenhouses highly attractive to pests and diseases Nevertheless very little attention has been paid to the manipulation of greenhouse environments expressly to avoid disease epidemics and insect infestations which together can easily account for 30% of crop losses This book will be of immense value to all members of the scientific community involved in teaching research and extension activities on protected horticulture It also offers a useful reference guide for policymakers and practicing farmers and can be used as a textbook for postgraduate courses *Transgenic Crops III* Y.P.S. Bajaj, 2013-06-29 There has been tremendous progress in the genetic transformation of agricultural crops and plants resistant to insects herbicides and diseases have been produced field tested and patented Transgenic Crops III compiles this information on ornamental aromatic medicinal and various other crops It comprises 26 chapters and is divided into two sections I Ornamental Aromatic and Medicinal Plants Anthurium Antirrhinum Artemisia Begonia Campanula carnation chrysanthemum
