

If you'd like the benefits of efficient and safe overhead material handling, but don't have your building structurally or financially suited for an overhead crane, check out the NOMAD from EMH. Buildings like those listed below may not work well with standard overhead cranes, but the NOMAD will adapt for the following reasons:

NOMAD® finds a home in:

Precast Concrete Buildings

The NOMAD can often be installed without bolting, eliminating the need for digging through and damaging existing floors.

Lesser Buildings

All of the NOMAD's connections are built for easy disassembly and relocation. If you think you may move sometime in the future, you can easily take the NOMAD to a new site.

Buildings not designed specifically for overhead cranes.

The NOMAD's free standing structure supports loads your building's steel might not handle. And the low overhead design allows it to fit into sites where headroom might otherwise be a problem.

Think again if you're ruled out an overhead crane. NOMAD can give you the material handling you need at a price you'll like. Call EMH today for details.

Tie back to existing building structures not required.

Runway Electrification is 100 amp, grounded steel "finger safe" conductor for Superior conductivity. Easy to install and maintain.

EMH Top Running Overhauled with travel speed of 50 or 120 FPM (27.8 or 54.9 m/min) complete with mounting plates, bolts and hardware.

EMH Wire Rope Hoist Lift: 20 ton available. Lifting Speed: 16.7 & 33.3 FPM. Trolley Speed: 40 FPM (18.3 m/min).
