between opposing groups and identifies those who are willing to act in order to change these situations The backdrop of the Arab Israeli conflict is used to demonstrate how collective identities are shaped by membership in ethnic and religious groups and how these identities influence attitudes and behavior It examines political attitudes hatred of others and willingness to assume responsibility for the various social issues of this conflict This book takes a fresh approach to the Arab Israeli conflict by relating it to three distinct societies Jews Arabs and Palestinians Though it deals with conflict this assessment is optimistic in the sense that it shows that bridges can be built and maintained among these groups These bridges are still small and fragile but may be the structures upon which more elaborate relationships may be developed
