

BRIEF COGNITIVE RATING SCALE (BCRS)
Guidelines for Using the BCRS

The BCRS is an assessment tool to be used with the Global Deterioration Scale (GDS) to help stage a person suffering from a primary degenerative dementia such as Alzheimer's disease. Developed by Dr. Barry Reisberg, this assessment tool tests 5 different areas known as Axis (4 cognitive and 1 functional). For the first 4 axis, the tester will ask a variety of questions to determine the level of impairment (see Guidelines for Scoring BCRS at the bottom of this page). The results of the 5th axis (Functioning) are determined primarily by observation. Tester can use the Functional Assessment Staging test (FAST) for a more accurate assessment. After a score is determined for each Axis, total the results and divide by 5. This answer will result in a stage corresponding on the GDS.

Geropsychology Assessment Resource Guide, 1993

Primary Care Tools for Clinicians Lorraine Loretz, 2005-01-01

Designed to save time and assist busy practitioners this book guides standardized assessment and documentation of a patient's condition by providing ready to use forms that represent the gold standard of current practice [Guidelines for Drug Trials in Memory Disorders](#) Nicola Canal, 1993 [A Guide to Treatments that Work](#) Peter E. Nathan, Jack M. Gorman, 1998

Numerous psychologists and psychiatrists most of whom work in the US collaborate on 28 articles about psychopharmacological or psychosocial treatments of DSM IV categories for which there are known treatments. Contributors were asked to present the most rigorous scientifically based evidence for the efficacy of the treatments. As a result readers can distinguish between those treatments that have been scientifically validated and those that are felt to be of value but have not been properly examined scientifically. Bond, Windy Dryden, 2002-06-14 Brief Cognitive Behaviour Therapy can be applied to the treatment of a wide range of problems in many different settings. Rating Scales in Parkinson's Disease Cristina Sampaio, Christopher G.

Goetz, Anette Schrag, 2012-05-01 For many years the need to develop valid tools to evaluate signs and symptoms of Parkinson Disease PD has been present. However the understanding of all intricacies of rating scales development was not widely available and the first attempts were relatively crude. In 2002 the Movement Disorders Society created a task force to systemize the measurement of Parkinson's Disease. Since then the Task Force has produced and published several critiques to the available rating scales addressing both motor and non motor domains of Parkinson Disease. Additionally the task force initiated a project to develop a new version of the UPDRS the MDS UPDRS. But none of this was made available in one convenient source. Until now Rating Scales in Parkinson's Disease Clinical Practice and Research is written for researchers from the medical and social sciences and for health professionals wishing to evaluate the progress of their patients suffering from Parkinson's Disease. The book is both exhaustive in the description of the scales and informative on the advantages and limitations of each scale. As such the text clearly guides readers on how to choose and use the instruments available. Extensive cross referenced tables and charts closely integrate the parts of the book to facilitate readers in moving from one symptom domain to another.

Psychiatric-mental Health Nursing, Louise Rebraca Shives, Fourth Edition Katy R. Reynolds, Shives, 1998 Scales for Assessment of Diagnosis and Severity of Mental Disorders Per Bech, 1993 The Practical Handbook of Clinical Gerontology Laura L. Carstensen, Barry A. Edelstein, Laurie Dornbrand, 1996-06-24 Applied gerontology and geriatrics always entail a multidisciplinary perspective and usually demand an interdisciplinary treatment approach. Providing a unique combination of perspectives treatment approaches and expertise The Practical Handbook of Clinical Gerontology explores issues relevant to practitioners who work with the elderly. A leading cast of contributors representing the fields of psychology, medicine, neuropsychology, nursing, and law examines what is known about specific disorders and discusses treatment techniques and the development of intervention plans. This comprehensive volume begins with an overview of several broad topics pertinent to the treatment of older adults and discusses special considerations in assessment. It then presents up-to-date information on treatment of specific psychological and behavioral disorders of older adults. The final section covers interdisciplinary issues including information about common medical problems, rehabilitation, and the psychopharmacological treatment of mental health problems. Written in a language that is accessible to a general health care audience, this extensive volume will be a valuable resource for mental health care providers, medical students, researchers, and graduate students in such fields as geriatrics, gerontology, nursing, psychology, and social work. Please note the following three quotes are from the same person. This handbook has a variety of attributes that make it a highly desirable desk reference for today's mental health practitioners in geriatrics and gerontology. Few stones have been left unturned in the 22 reader friendly chapters that comprise the handbook. Not only are general treatment issues addressed in great detail but assessment procedures, the treatment of specialized psychological and behavioral problems, and even issues in effective collaboration with medical geriatricians are considered. The scope and breadth of clinical knowledge and wisdom found within the covers of this volume are certainly impressive. Lenard W. Kaye, Professor, Bryn Mawr College. The authors have succeeded in drawing on the expertise of a broad range of recognized authorities in clinical gerontology who have the capacity to communicate to the reader with considerable clarity both current information and best practice strategies of mental health intervention with older adults. Lenard W. Kaye, Professor, Bryn Mawr College. It would be difficult to find another reference source in clinical gerontological practice that is able to deal with the challenges of practice in this area with greater comprehensiveness and authority. The multidisciplinary perspective of the handbook ensures its being a valuable addition to the clinical practice collections of psychologists, social workers, nurses, gerontologists, and other allied health professionals. And once obtained, it should not gather dust given the currency and utility of the information. Lenard W. Kaye, Professor, Bryn Mawr College.
